# petco love lost

REUNITING PETS

Let's unite to reunite lost pets with their families.

According to industry statistics, one in every three pets will go missing in their lifetime. Thanks to ground-breaking innovation, finding lost pets will be quicker and easier with the patented pet facial recognition technology of the new Petco Love Lost searchable database.

We're on a mission to keep pets where they belong … at home, with you.

Help us get pets home!

This simple-to-use tool is available for free to any pet parent or person who finds a lost pet. Uploaded photos of a missing dog or cat are immediately scanned to determine whether the lost pet is at a participating shelter or with a neighbour in the community. Brampton Animal Services has partnered with Petco Love Lost by sharing photos of lost pets that enter our shelter in the hopes of reuniting them with their families.
