

INTERSECTION SIGHTLINE TRIANGLE

1. The following diagram illustrates the intersection sightline triangle.

Points of the Sight Triangle	Description	
Site Distance Clearance Points (A)	50 km/hour Major Road	90 metres
	60 to 70 km /hour Major Road	120 metres
Roadway Point of Intersection (B)	Point where the driver's position of the approach vehicle on the minor road intersects the edge of the outside travel lane of the major road.	
Position of Stopped Vehicle (C)	The driver's position of a vehicle stopped on the minor road. This point is set 4.5 metres back from the Roadway Point of Intersection (B).
