

NOTICE OF STUDY COMMENCEMENT
Streetscaping Improvements
for
Main Street (Wellington Street to Nelson Street East) and
Queen Street (Elizabeth Street South to Chapel Street)
Class Environmental Assessment Study

The Study

The City of Brampton has initiated a Class Environmental Assessment for streetscaping the downtown to create an aesthetically beautiful environment to boost the image and awareness of the downtown revitalization efforts. The main objectives are to create a complete street that will capitalize the walkability and pedestrian capacity downtown, to animate these streets and to become a place making destination capturing the heart of Bramptonians and visitors.

The Process

The study is being undertaken in coordination with the Region of Peel's Watermain Replacement Program - Phase 1 and in accordance with the planning and design process for Schedule "B" projects as outlined in the Municipal Class Environmental Assessment document (October 2000, as amended in 2007, 2011 and 2015), which is approved under the *Ontario Environmental Assessment Act*. This study will define the problem, identify and evaluate alternative solutions to the problem, evaluate alternative design concepts for the solution, recommend a preferred design concept and assess potential impacts and identify mitigation measures associated with the preferred design.

A key component of the study will be consultation with interested stakeholders, including the public agencies and Aboriginal Communities. Two Public Information Centres (PICs) will be held to present the project, review the study findings and discuss issues related to the project including alternative solutions, evaluation criteria, alternative design concepts, and environmental impacts and mitigation measures. Details regarding the forthcoming PICs will be advertised as the study progresses. At the conclusion of the study, the EA process will be documented in a Project File which will be made available for 30 calendar days for public review and comment.

Comments Invited

If you have any questions or comments regarding the Study or wish to be added to the Study mailing list, please contact either of the project team members:
