

NOTICE OF PUBLIC INFORMATION CENTRE NO.2
Downtown Streetscaping Improvements
Main Street (Wellington Street to Nelson Street East) and
Queen Street (Mill Street South to Chapel Street)
Municipal Class Environmental Assessment Study

The Study

As part of the downtown revitalization efforts, the City of Brampton has initiated a Class Environmental Assessment (EA) for streetscaping the downtown to create an aesthetically beautiful environment. The main objectives are to study alternatives that will capitalize on the walkability, pedestrian capacity and active transportation in the downtown, and to animate these streets to become a place making destination. A number of alternatives for streetscaping have been examined including their impacts to the social, cultural, and natural environments.

The Process

The study is being undertaken as a Schedule "C" process in coordination with the Region of Peel's Downtown Brampton Capital Project Phase 1, and in accordance with the planning and design process as outlined in the Municipal Class Environmental Assessment (Class EA) document (October 2000, as amended in 2007, 2011 and 2015), which is approved under the *Ontario Environmental Assessment Act*.

A key component of the study is consultation with stakeholders. The first PIC was held on February 23, 2017 to present the stakeholders with a number of alternative solutions. The preferred alternative solution has been finalized considering comments from stakeholders. The second PIC will present the preferred alternative design for input from stakeholders. The date and details of this second PIC are as follows:

Date and Time: Thursday, April 27, 2017 – 6:30 p.m. to 8:30 p.m.
Locations: Rose Theatre - Studio Room
1 Theatre Lane, Brampton

Anyone with an interest in this study is invited to attend and participate. If you cannot attend and would like to provide comments, please forward all comments by May 5, 2017 to project team members listed below. The Notice of Completion will be advertised at the conclusion of the study. An Environmental Study Report will be prepared documenting the decision-making process and made available for public review and comment for a 30-day period.
