

MAINTENANCE & OPERATIONS

2014 Road Improvement Program

BRAMPTON
Flower City

brampton.ca

Maintenance and Operations

The Maintenance and Operations Division is responsible for the City's road infrastructure, storm water management systems, parks and community open spaces.

The Roads Maintenance and Operations section provides service to:

- 3,400 lane kilometres of roads
- 143 storm water ponds
- 42,000 street lights
- 310 traffic signals
- 157 crossing guard locations
- 3,800 permit locations
- 674 fleet managed units

For updates on everything you need to know about road construction, road closures and traffic services in Brampton, visit www.brampton.ca/roadworks. Use the index to find what you are looking for.

2014 Road Improvement Program

The City of Brampton has started work on its Road Improvement Program to ensure safe and convenient transportation for all citizens. For your reference, here is a list of road construction projects and other road-related activities taking place within city boundaries. For detailed status updates and a complete list of projects, visit www.brampton.ca/roadworks.

Types of Projects

Bridge Rehabilitation involves the modification, alteration or improvement of existing bridges on City of Brampton roads and pedestrian footbridges within Brampton's parks.

Environmental Assessments are performed prior to undertaking a major road construction project to identify and address the overall impact of the project on the social, cultural and natural environment. This is an approved process that municipalities must follow under the Ontario Environmental Assessment Act.

Future Construction Projects Under Design involve the preparation of detailed design contract drawings and technical specifications for construction projects, such as new roads, grade separations and intersection improvements.

Intersection Improvements are modifications done to improve the safety of the intersection, such as adding turn lanes and curbs, resurfacing the road and changing pavement markings.

Major Road Construction includes the construction of new roads, widening or reconstruction of existing roads and grade separations by the City of Brampton.

Noise Walls are installed adjacent to properties on arterial roads to reduce the noise levels generated by traffic.

Road Resurfacing involves grinding out and repaving the road surface to restore it to its original state. When resurfacing the road, work crews also repair concrete curbs, sidewalks and catch basins, raise and adjust maintenance holes, and restore damage caused to sod, driveways and private curbs as a result of construction.

Sidewalk Construction includes the construction of new sidewalks as part of the City's 10-year capital program.

Street Lighting Upgrades involve the replacement of the existing and obsolete street lights and underground infrastructure.

Traffic Calming involves the development of a concept plan, detailed design and construction of traffic calming measures to reduce the speed and volume of traffic in a neighbourhood.

Traffic Signal Upgrades and Installations include new installations and modernization of City-owned traffic signals and flashing 40km/h school zone signs.

Note:

- Year-round activities, such as pothole repairs and maintenance to street lights and traffic signals, are ongoing and not reflected in this list.
- The list of projects is subject to change.

WARD 1

Street Name	Project Location	Description
Bovaird Drive (Züm)	Mount Pleasant Go Station to Airport Rd	INT CO
Centre Street North	Williams Pkwy to Kennedy Rd	SL CO
Charters Walkway	Charters Rd to Rutherford Rd N	SL
Huronario-Main Street LRT	Downtown Brampton to Port Credit GO	EA CO
Ken Whillans Drive	Church St E to Nelson St E	EA CO
Layham Gate	Main St to Calvertdale Rd	RR
Madoc Drive	Archdekin Dr (W) to Rutherford Rd	RR
Reigate Walkway	Reigate Ave to Crawford Dr	SL
Williams Parkway	Kennedy Rd to North Park Dr	DD CO
Williams Parkway	McLaughlin Rd to Kennedy Rd	DD CO
Williams Parkway	McLaughlin Rd to North Park Dr	NWD CO
