

About Our Winter Operations

City of Brampton work crews are ready for the winter weather. When it snows, we maintain roads and sidewalks in a priority order.

	What's done?	When?
Primary roads <ul style="list-style-type: none"> carry high volumes of traffic (e.g. Main Street, Bramalea Road) are on a Brampton Transit/Züm bus route have a Peel Public or Separate school 	First to be cleared when it snows Salted as needed, then plowed continuously during any snowfall	Completed within 24 hours after the end of a snowfall**
Local residential streets and courts	Started once primary roads are complete Salted (may be sanded during extreme cold weather) Plowed when a single storm results in 7.5 cm or more of snow	
City-cleared sidewalks <ul style="list-style-type: none"> on primary roads in front of City parks/facilities curb-faced (no grass boulevard) behind a property on roads with Brampton Transit/Züm bus stops 	Plowed and sanded	
Recreation facility parking lots	Salted and/or sanded	
Park recreation trails	Salted and/or sanded Plowed when snow accumulation reaches 7.5 cm	

****These are our service level goals. Service may take longer – up to 48 hours or more – if weather conditions are severe.**

Thanks for being a good neighbour and doing the right things:

- Clearing snow and ice from your sidewalks by 11 am the day after a snowfall
- Clearing the sidewalks in front of and beside your property if you live on a corner lot
- Not shovelling snow from your property onto the road or sidewalk
- Not parking on the street until it has been salted or plowed (even if you have a valid permit to park). Parking on the street during or after a snowfall blocks access for snow clearing equipment and emergency service. Vehicles may be ticketed or towed.
