Background Information

Section 27 of the *Ontario Heritage Act* requires each municipality to keep a Heritage Register of property that is of cultural heritage value or interest. The City maintains two Heritage Registers:

- 1) A register of property that has been **designated** under either Section 29 (individual property) or Section 41 (property within a heritage conservation district) of the *Ontario Heritage Act*. This register is known as the Municipal Register of Cultural Heritage Resources Designated under the Ontario Heritage Act. See Section 27 (1.1) of the *Ontario Heritage Act*.
- 2) A register of property that has been identified or **“listed”** but is not yet designated. This register is known as the Municipal Register of Cultural Heritage Resources; See Section 27 (1.2) of the *Ontario Heritage Act*.

The Municipal Register of Cultural Heritage Resources was originally compiled between 1991 and 1993 by City staff and the Brampton Heritage Board. City Council endorsed this inventory for use as a record of heritage resources in 1995 and again in 2003.

The Register is an administrative and documentation tool used to assist in identification and on-going preservation of significant heritage resources within the land uses planning and permit application process. It is also used to set priorities for subsequent heritage designations under Part IV of the *Ontario Heritage Act*. As such, the Register also represents basic public acknowledgement of the contribution of specific heritage resource to the rich cultural history of Brampton.

Listed Properties and Demolition Control

A provision in the *Ontario Heritage Act* helps protect Section 27 (1.2) “listed” properties through interim demolition control.

Section 27(3) of the Ontario Heritage Act states that the owner of a property included in the Heritage Register under Section 27 (1.2) shall not demolish or remove a building or structure unless the owner gives Council at least 60 days notice in writing of the owner’s intention to demolish.

Section 27 (5) states that the notice of intention to demolish shall be accompanied by such plans and shall set out such information as the Council may require. Under this provision the City asks for a heritage impact assessment and mitigation plan. This provision is used to ensure appropriate due diligence is completed prior to the approval of demolition permits. The provision can also be used by the City to determine if heritage designation is warranted.

The other key form of demolition control is the city-wide Demolition Control By-law that applies to all residential building stock – including heritage residential buildings.

The Heritage Evaluation Process:

Every potential heritage resource hold certain attributes and characteristics that reflect a degree of cultural heritage value or interest. Before inclusion in this Register the cultural heritage value of a given property must be assessed, using a set of provincially regulated criteria, that determines overall merit and significance within the following categories:

- Historical or associative value; and/or
- Design or physical value; and/or
- Contextual value.

Based on the criteria, the heritage attributes and overall cultural heritage value of each resource is evaluated and assigned a grade score:

<u>Points</u>	<u>Category</u>	<u>Significance</u>
70+ points	A	<u>Most Significant:</u> Municipal designation under the Ontario Heritage Act will be pursued.
40-69 points	B	<u>Significant:</u> worthy of preservation, municipal designation under the Ontario Heritage Act will always be considered.
0-39 points	C	<u>Contributing:</u> Contributes to an area, streetscape or neighbourhood; some noteworthy heritage attributes are present; designation may be considered but on a case-by-case basis only. Contributing Properties are <u>not</u> listed in this Register.

The evaluation process for "listing" purposes is preliminary in nature. Thus, a "listed" property may be subject to periodic re-evaluation and re-grading by the Heritage Coordinators, as additional information is uncovered or as properties undergo future restoration or alterations. Properties may also be evaluated in greater depth as a result of a heritage impact assessment, a cultural heritage study associated with block plans and secondary plans and with heritage designation.

Much of the current scoring reflects results of a comprehensive and rigorous inventory re-evaluation project completed by Untermann-McPhail Associates in 2002-2003. An additional 158 properties were re-evaluated as part of phase two of the project, completed in the Summer of 2005.

The Approval Process:

Properties can only be listed in the Register after undergoing: a) field assessment; b) research and documentation; c) criteria evaluation; d) formal review by Brampton Heritage Board; e) endorsement of Planning, Design and Development Committee and City Council, usually through approval of the monthly minutes of the Brampton Heritage Board.

The Numbers (as of October 2008):

- **Approximately 130** properties have been added to the Register since 2004.
- There are currently **397** properties on the Register. **75** of these properties are rated Category A (highlighted in **bold**) and the remainder are rated Category B. Category C properties are not listed in the Register.
- Properties are removed from this Register if they are subsequently designated under the Ontario Heritage Act. Since 2004, approximately **20** properties have been removed from this Register once heritage designation by-laws were passed. See the separate Municipal Register of Cultural Heritage Resources Designated under the Ontario Heritage Act for more details.

Removal from Heritage Register

Since the mid 1990s, some **39** properties have been lost due to fires, demolition and removals. These properties are denoted by a ~~strike through~~. Unless otherwise indicated, a strike through indicates that the subject property has been removed from the Heritage Register by fire, removal, demolition, etc.

Properties are also removed from the Municipal Register of Cultural Heritage Resources upon completion of the heritage designation process. In these instances the properties are noted on the **Municipal Register of Cultural Heritage Resources Designated under the Ontario Heritage Act**. Please refer to that document for further information.
