

Stakeholder Update #8

The City has retained peer reviewers to assess Brampton Brick's technical reports related to the Norval Quarry rezoning application (see below). The peer review studies will be funded by the City, not by Brampton Brick.

City staff will meet with the peer reviewers in order to review timelines and deliverables. One comprehensive work plan that indicates the tentative timeline will be available on the project website. You will receive another stakeholder update once this information is available.

In addition to the peer reviews, staff will prepare a status update targeted for the December City Council meeting.

For additional information on the rezoning application, please contact the City's planner, Natasha D'Souza.
