Jefferson, Jayfield and Jordan Parks Restoration Project - Phase One

Start Date: Fall 2020

Completion Date: Winter 2021

**Timeline is subject to change*

In collaboration with City of Brampton, Toronto and Region Conservation Authority (TRCA) is implementing a stream restoration project in Jefferson, Jayfield and Jordan Parks to restore and naturalize 1 km of Mimico Creek. This project is being implemented as part of the new Brampton Eco Park Strategy, and will also include upgrades to park amenities, including fitness stations, amphitheatre, outdoor classroom, stream lookouts and more! The existing stream is a straight concrete lined channel with minimal natural vegetation and habitat features, providing poor conditions for fish and wildlife. By removing the concrete lining and naturalizing the watercourse, aquatic habitat and water quality will be improved. Small wetlands will be created to intercept stormwater, which will provide areas for settling and filtration prior to entering the creek, as well as an increase in habitat diversity for local species.

Native tree and shrub plantings along the stream corridor and throughout the park will assist with site stabilization, provide shade to the watercourse, improve natural habitat cover for local wildlife, and enhance natural greenspace for the community.
