

NOTICE OF COMMENCEMENT OF TRANSIT PROJECT ASSESSMENT PROCESS

New Brampton Transit Bus Maintenance and Storage Facility

The Project

The City of Brampton is undertaking the planning and preliminary design of a new bus maintenance and storage facility for use by Brampton Transit located at the southwest corner of Highway 50 and Cadetta Road. The project aims to increase maintenance and storage capacity for existing and new buses, which are required to improve transit service in Brampton. The facility will include a storage area, maintenance garage, administrative offices and staff parking. A map of the study area is shown to the right.

The Process

The City of Brampton is assessing the environmental impacts of a new bus maintenance and storage facility according to the transit project assessment process (TPAP) as prescribed in Ontario Regulation 231/08, Transit Projects and Metrolinx Undertakings.

As part of the TPAP, an Environmental Project Report is being prepared, which documents the planning and design process. The report will include existing and future environmental conditions, details of the preferred design, and impacts, mitigation and monitoring measures.

A Public Open House will be held in early-2021. A notice for the Open House will follow. All information produced as part of this project, including the previous public open house materials, is available on the project website: brampton.ca/EN/residents/Roads/Pages/road-works-details.aspx/3098/Transit-Maintenance-Facility.
