NOTICE OF FIRST PUBLIC INFORMATION CENTRE

Heritage Road Improvements
From Steeles Avenue to Rivermont Road
Class Environmental Assessment Study

The Study
The City of Brampton is carrying out a Class Environmental Assessment for improvements to Heritage Road from Steeles Avenue to the future Rivermont Road (formerly known as Riverview Heights Road), approximately 460 metres north of Embleton Road (see map). In order to best address operational deficiencies and the need for additional north-south capacity in the area, a number of alternatives will be examined as part of the study. The alternatives may include, but are not limited to, the potential widening of Heritage Road to four lanes, cross-sectional elements, intersection improvements, traffic operations, and the overall impact of such improvements on the social, cultural and natural environments.

The Process
The study is being carried out in accordance with the planning and design process for Schedule ‘C’ projects as outlined in the Municipal Class Environmental Assessment (October 2000, as amended in 2007 and 2011), which is approved under the Ontario Environmental Assessment Act. A key component of the study will be consultation with interested stakeholders (public and agencies) at two Public Information Centres (PICs). The first PIC has been arranged for:

Date: September 19, 2013
Time: 6:30 P.M. to 8:30 P.M.
(Drop-in-Centre Format)
Place: Huttonville Public School/Community Centre
2322 Embleton Road
Brampton, Ontario L6X 0C9

The map above shows the approximate limits of the study area.

The purpose of the PIC is to obtain public input after reviewing the problem being addressed, background information, the alternative solutions being considered, and identifying a preliminary preferred alternative solution. Anyone with an interest in the study is invited to attend and participate. If you cannot attend and would like to provide comments, please forward them by October 3, 2013 to the City of Brampton at the address below. Following the PIC, the study findings will be reviewed in light of comments received and the preferred alternative solution will be determined. A second PIC is tentatively scheduled for early 2014.

Comments Invited
If you have any questions or comments regarding the study, or wish to be added to the study mailing list, please contact either of the following project team members:

Bishnu Parajuli, M.A.Sc., P. Eng.
Project Engineer
City of Brampton
