## PLANNING & DEVELOPMENT SERVICES DEPARTMENT

### Digital Submission Standards – Block Plan

#### Introduction

The following information outlines the requirements of digital submissions for Block Plans. By following the instructions laid out in this document, it will allow for more effective customer service, and better integration of digital plans into the City of Brampton's Corporate GIS.

*For each submission or modification of the Block Plan the applicant is required to submit the following:*

#### Each Submission must contain:

- One (1) digital CAD file of the plan must be submitted in **MicroStation DGN (2D) or AutoCAD DWG (2D)** format. No reference files are to be used.
- One (1) digital **PDF** of the plan in preferably 24" x 36" (Architectural D size) representing an exact copy of the paper submission must be provided.
- The digital drawing must be georeferenced. The standard coordinate system for the City is Universal Transverse Mercator (UTM) Zone 17 with the North American Datum 1983 (NAD83). The map units for all features in the file must be in metric, set to metres and un-scaled (1:1). A base seed file for a specific area is available upon request from Technical Services, Planning and Development Services Department.
- The plan must be specifically formatted to be clear and legible in preferably 24" x 36" (Architectural D size) landscape print format. It should be proportionally scaled by the applicant to fit their plan.
- Applicable Layers/levels must be as set out in the Level Structure below, as provided within the base seed file. Weights and colours are at the discretion of the applicant.
- For any revisions arising out of the circulation and review process requiring the submission of revised drawings; a revised PDF and digital CAD version must also be submitted to Technical Services, Planning and Development Services Department via email ([gis.planning@brampton.ca](mailto:gis.planning@brampton.ca)) or on CD or DVD. Please include a contact name and a brief description of the contents including the city file name of your application.
- **Please note that for drawings submitted in MicroStation DGN (2D) or AutoCAD DWG (2D) format, georeferencing and level names must remain accurate and consistent, and continue throughout all stages of the Block Plan submission.**

#### General Notes

- Use common line-types and fonts (TrueType Fonts). Colour palettes, font types, or reference files are to be submitted along with the digital drawings.
- Where applicable, all line work must be closed, creating polygons, meaning that all lines that meet must be snapped together.

- GIS\_ANY\_OTHER\_FEATURE (i.e. GIS\_WOODLOT) naming convention must be used to identify any other significant features not identified within the Level Structure below, but included within the drawing submission.

However, the basic wording details on the attached example must be adhered to; including:

- the type of application and a description;
- a listing of the owner and the agent;
- the following text: "For more information about this matter, including information about obtaining a copy of the notice and about preserving your appeal rights, contact the Planning & Development Services Department by visiting City Hall during regular business hours, by sending an email to : [planning.development@brampton.ca](mailto:planning.development@brampton.ca), or by calling 905-874-2050. Refer to File # \_\_\_\_\_"
- a note that the illustration is a conceptual plan for information purposes, that is subject to change; and
- a note identifying "Date Sign Erected":

**Size and Height:**

- Minimum size: 2.4 metres wide by 1.2 metres high.
- Ground clearance: 0.9 metre minimum, 1.2 metres maximum.
- Sign to be mounted to supports with 12mm hex head bolts and nuts with flat washers both sides.

**Sign Supports:**

The sign supports must be able to sustain the weight of the application sign for a considerable period of time and through various climatic conditions (i.e. heavy winds) so as to ensure that the sign does not fall over. Therefore, the sign must be mounted in a manner ensuring stability. Accordingly, concrete footings are recommended, to be formed against undisturbed, well-drained soil to a minimum depth of 1.3 metres with a compressive strength of 25 mpa at 28 days.

**Materials:**

2cm exterior grade plywood panel with horizontal fir stringers to be located behind the top, bottom and centre of the sign panel.

**Lettering:**

The sign to be professionally lettered or silk-screened with dark blue or black lettering on a white background. Typefaces to be Arial (***see references to Typeface A on attached example of typical sign specifications with type A being Arial***). All typeface may be condensed or extended to fit the sign area.

**Location:**

One sign shall be erected along each street frontage of the property so as to be clearly visible from the street, and shall be erected at a minimum distance of 1.5 metres (5 feet) from the lot line and midway between the opposing property lines. The sign shall be erected in a location ensuring safe sight lines at intersections, driveways etc. and if safe conditions are not met, then the applicant shall remove and re-install the sign to the satisfaction of the City at the owner's expense

**PART B – PROOF THAT SIGNAGE HAS BEEN INSTALLED TO CITY SPECIFICATIONS INCLUDING OBLIGATIONS REGARDING MAINTENANCE AND SIGN REMOVAL:**

Prior to an application being allowed to proceed to a formal public meeting as required under the *Planning Act* of Ontario, and within 14 days of receipt of the application by the City of Brampton, the applicant must submit a letter signed by the owner to the assigned planner in the Planning & Development Services Department, confirming that a sign has been erected in accordance with the City's requirements and agreeing to other obligations regarding sign maintenance and sign removal. Further, a photograph of the installed sign and a digital copy (i.e. pdf version) of the map, that was used on the sign, is also to be provided to the assigned planner.
