Calculation

Except as otherwise noted, the calculation shall be applied by applying the percentage change in the factor year over year.

To determine the number of additional Taxicab Owner's Licences (plates) to be issued, the Licence Issuer shall:

- Obtain statistical information for the each of the factors set out in the four criteria for:

APPENDIX 1

- the year prior to the last time taxicab owner's licenses (plates) were issued (Year A), and
 - the year prior to the time that the calculation is being made (Year B)
- Calculate the percentage change for each of factors year over year
 - For Criteria 1, 2 and 4 - Calculate the average percentage change
 - For Criteria 3 – Calculate the average percentage change for the "Sectors", then calculate the average percentage change of the "Total Population" and the "Sectors"
 - Calculate the average percentage change for the averages of the four criteria
 - Calculate the "weighted percentage change" for each of the four criteria by multiplying the average percentage change for each by the weighted percentage
 - Calculate the net percentage change by averaging weighted percentages of the four criteria
 - Multiply the net percentage change by the total number of taxicab owner's licences at the time the formula is being applied

That resultant calculation identifies the number of additional Licences to be issued. If the number is positive, that number of Licences shall be issued. If the number is negative, no Licences shall be issued.
