Adam Epstein	General Manager	In-House Lobbyist	Paytm	Paytm	Closed	Financial Services	Payments at the City of Brampton	<p>Paytm is a prominent Indian mobile commerce ecosystem (+250 million users with 8 million daily transactions) funded by Alibaba and Softbank (+\$2.5 billion raised) that's expanding internationally with Canada being the first country.</p> <p>Our product in Canada is a bill payment app: a mobile first alternative to all of one's monthly bills. Since we launched in March, tens of thousands of Canadians have paid +\$4 million in bill payments for primarily telco, utility, and taxes and other local bills.</p> <p>We're not beginning to partner with cities throughout the country to help minimize both the operational and processing costs of handling municipal payments.</p> <p>Naturally, we'd love explore a potential partnership with the City of Brampton.</p>	Senior Manager of Revenue		Closed
Adam Goldie	Transportation New Business Sales Manager	Consultant Lobbyist	Vaisala Canada Inc	Vaisala Canada Inc	Approved	Infrastructure - Roads	Winter Road Maintenance Technology	<p>Vaisala Mobile Detector MD30</p> <p>The first road surface state sensor designed specifically for snow plows</p> <p>MD30 monitors road conditions and transmits weather data — surface surface state, grip, relative humidity, dew point and road and air temperature — from snow plows or any vehicle without disruption and works well as a standalone sensor or to help fill in data between stationary weather stations.</p> <p>Features</p> <p>Built Tough: Designed for snow plows and molded to withstand heavy vibration and prevent water ingress. The patent-pending hood protects the lens from snow and road spray and easily removes for cleaning.</p> <p>Surface Temperature is only part of the story: MD30 transmits real-time data on grip and road state, layer thicknesses of water/ice/snow, road and air temperature, relative humidity, frost and dew point.</p> <p>Simple and Affordable: Compact size enables easy installation with many options, and the affordability enables wide-scale fleet deployments.</p> <p>Solid Technology Foundation: Features the third generation of Vaisala's market-leading DSC laser technology and benefits from Vaisala's experience in industry-leading weather measurement.</p> <p>Data Visualization: Leverage live data and imagery to support treatment actions.</p> <p>Wx Horizon</p> <p>Observation driven pavement condition forecasting tool. Pulls in data from your current inputs, combined with Vaisala resources, to formulate a forecast of your road pavement condition. This gives you a better understanding of when the next storm will begin and what areas of your road network will be most affected.</p> <p>Wx Horizon benefits include:</p> <p>Maintaining safer roads – Equips decision-makers with all of the information they need to decide when and where to deploy their fleet.</p> <p>Simplifying and saving time – Provides observations, current assessments, and near-future forecasting of road conditions in one interface.</p> <p>Obtaining actionable data from all devices – Combines sensor data from Vaisala and other manufacturers.</p> <p>Delivering insight on road treat</p>	Supervisor, Road Operations (East)		Approved

Andrew Safranko		Consultant Lobbyist	Achu Health		Approved	Economic Development	Return to work / Remote Work Health & Wellness Tech Platform	Achu Health has a product called @Work by Achu Health which is a digital application on iOS, Android, and Web platforms. The product provides transparent communication, data aggregation, and reporting on employee health and wellness - both in the office and working remotely. The platform enables employees to check in daily on their physical and mental health symptoms, book a workstation in advance of their work day should they be planning on working within the workplace, and privatize the employee's commute with a private shuttle service allowing for the employer to provide a safe and healthy environment from the beginning of the day right through to the end. Working with any size business, @Work scales quickly and can be customized to the specific organizational policies a company may have. Employee onboarding is as quick as downloading an app off an app store or pulling up a website - the experience is meant to be quick and simple to ensure employees aren't slowed down by digital forms and employers have the data they need to provide and safe and health work environment.	Economic Development Manager Sector Manager, Innov&Technologies		Approved

Arie Ben-Dor	Co-Founder/Principals	Consultant Lobbyist	ROA Solutions Inc.		Approved	Transportation	Public Hygiene and Sanitation System for Public Transportation	Public transport vehicles and stations are crowded and confined environments that exhibit high foot traffic, making them a perfect breeding ground for germs and bacteria which can put people at high risk of contracting diseases or viruses on their commute. A "smart" hand sanitizer dispenser that integrates with fare collection systems to ensure all passengers sanitize their hands prior to entering a public transport station or vehicle. • Our solution assists with the prevention of spreading germs and bacteria amongst commuters and transit workers, improving the overall sanitation and hygiene levels across public transport vehicles and stations. • there are currently no other smart dispensers on the market that integrate with fare collection systems to ensure user compliance. • The integration is seamless and unique, allowing for a smooth sanitize & pay process. • Our unique integration system is patented, ensuring no one can copy it. • The entire process is completely touch-free A Understanding that the world as we know it will not be the same post COVID-19. • Developing solutions that are user-focused based on the human-centered design approach. • This will be achieved through deep market research. OUR CleanRide: Technological & Regulated • A smart, automated hand sanitizer dispenser. • Wirelessly connected to the fare collection system and installed adjacent to it. Ben Morse	Account Manager		Multivista	Multivista	Closed	Information Technology	Construction Photography	We would like to introduce Multivista Toronto Services to your office and the City of Brampton. Multivista documents all aspects of a building project using progression and "Exact-Built" digital photography. Our photography is scheduled at time based intervals and at every critical stage of a project. Multivista combines this photography with software to provide users with an "as built" record. Overlapping digital images interact with the architectural floor plans to deliver a third party permanent record of site conditions. Multivista's unique documentation system provides benefits in discovering and preventing construction defects, aiding in dispute resolution, improving project schedules, reducing warranty issues and modernizing construction and facility management processes. Bill Godfrey	Founder	Voluntary Unpaid Lobbyist	People Against Littering		Pending	Environment	Cleaning up our environment.	"People Against Littering", P.A.L. is a movement dedicated to a greener and cleaner Brampton. We organize two to three environmental cleanups a week. We go into our parks, our woodlands, along our scenic trails and into our creeks to clean up trash and litter. We try to make our parks as pristine as possible. We meticulously clean up, scouring areas for the tiniest pieces of litter. Our goal is not the glory of filling huge bags but the immense satisfaction of knowing that we leave our areas safer and less hazardous for wildlife and people alike. Last year I myself spent 725 hours litter picking and our group had 70 organized cleanups. We cleaned up tens of thousands of pieces of litter and many tons of trash. We hope to double our cleanups this year and triple or quadruple them next year. We tackled the most horrific environmental disasters that existed in Brampton. The worst area had to be in the ditches alongside Heart Lake Rd. where dumping is common. We cleaned up all the way from Mayfield Rd. down to Sandalwood Pkwy. Then there's Knightsbridge Park, we took out 1700 pounds of garbage over 5 cleanups. In Allan Kerbel Park and the Kiwanis Park the litter was so dense in spots we needed a rake and shovel to clean it up. On the surface of a Lakelands Park pond, there were thousands of tiny pieces of foam the size of poppy seeds and other litter. We used kitchen strainers secured to long poles to scoop that up. We have spent over 400 hours cleaning up Heart Lake Conservation Area. We cleaned up Rosealea, Conservation Dr., Burnt Elm, Cassie Campbell, Trudell Park, Wexford, Camden, Sandalwood, Loafer's Lake and more. Leading by our actions, our mission is to unite, inspire, and embolden citizens to take action against litter. We will empower communities and create a new social norm where litter and littering will no longer be tolerated.		Pending

Brad Zhang		In-House Lobbyist	Toppits Foods Ltd.	Toppits Foods Ltd.	Pending	Planning & Development - Minor Variance	To meet with Councilor (Mr. Pat Fortini) to request minor variance to property's use	We are a Food importer and distributor with almost 45 years of history in Ontario. We serve all customers in foodservice and retail sectors in the Canadian market. Our clientele includes Sysco, GFS, Flannigan, Summit, M&M, Sobeys, Metros, Loblaws, Costco and many other big and small restaurants, and health care facilities. Our business has grown to a point that we need to have our own processing facility. We have tendered an offer for the property at 4 Edvac Drive. However, the current zoning of M4-1548 does not permit food processing. We'd like to meet with Mr. Pat Fortini to discuss potential change to the allow us to use the property for food manufacturing, specifically we want to use 40% of the building for food processing. This facility is important for us to further grow our business and better serve our customers. It will also create potential 50 employment opportunities. And we'd like to move our headquarters to Brampton and make Brampton our home. We hope to have the support from the Councilor and the City. As our offer is on a condition of 20 business days to perform all due diligence, we'd appreciate it if we can meet with Councilor Fortini at his first availability. Cham Thomas	Director, Business Development	In-House Lobbyist	60	Relation1	Approved	Information Technology	Relation 1 : Data - Driven Marketing and Personalization	<p>Good Morning,</p> <p>Relation 1 is passionate about Personalization and Customer experience. For many of our clients, we have been able to influence their customers with relevant messaging and build optimal customer engagement journeys. In the past, we had a few discussions with the City of Brampton Performing Arts (Rose Theater) regarding Personalization and customer journey for their prospects. This project was similar to the ones that we are doing with a few other organizations in Tronto. As a follow up I wanted to connect with the team and provide additional insights on how Data-Driven Marketing can help in revenue generation. We help our clients with the following services.</p> <ul style="list-style-type: none"> •Ramp customer engagement •Conceptualize and Implement ideal customer journeys. •Recommend and upsell new events! •Promotional offers (Customer Acquisition, target High Value & dormant Customers <ul style="list-style-type: none"> •Better Segmentation and targeting. •Creation of Propensity Models (Churn &Engagement, Inclination to buy w/discounts vs full price) •Identification of early adopters and customers highly engaged in digital Channels <p>All the above services will help the Performing Arts Theater to drive growth and better customer experience.</p> <p>Should you have any questions, please feel free to reach me on 416 409 9422.</p> <p>Thanks and Regards</p> <p>Cham Thomas Director, Business Development</p>			Approved

Charles Kenney	SVP of Global Sales	Voluntary Unpaid Lobbyist	SEWORKS, Inc.		Approved	Information Technology	Cybersecurity Web Application Penetration Testing	<p>Pentoma is an innovative cloud-based service that is disrupting how organizations perform penetration tests on their web application URLs and APIs. By leveraging Artificial Intelligence, SEWORKS has created a pen-testing engine that provides a consistent, massively-scalable, and automated solution to simulate human attackers.</p> <p>With Pentoma, discovering security risks through full-scale penetration tests no longer requires human resources, excessive time and large budgets. Pentoma now takes care of it by automating the entire penetration testing process. It finds various categories of security vulnerabilities, such as SQL injection, CMD injection, file inclusion and XSS, by simulating real adversarial hacking attacks. You can easily identify security weaknesses that can be exploited by attackers, and prioritize security issues to remediate your application.</p> <p>Built by Hackers to Simulate Web Attacks Pentoma was developed by a team of ethical hackers that have performed thousands of penetration tests. CEO and Founder, Min P. Hong, assembled a team that has amongst its credentials, (6) time finalists of DefCon (Black Hat) capture the flag, and overall winner in 2018. So, hacking and pen testing is in our DNA.</p> <p>Through the years, customers voiced their objections of human penetration testing which include the following:</p> <p>Challenges with Human Pen Testing:</p> <ul style="list-style-type: none"> •Expensive •Not done frequently enough •Not uniform. Not Consistent •Take many days/weeks/months •Not Comprehensive. Not thorough •Hard to find talented pen testers •The test is only as good as the skills of the Tester <p>These objections became the inspiration for Pentoma.</p> <p>Pentoma Benefits:</p> <ul style="list-style-type: none"> •Less expensive than human pen tests •Available as SaaS subscriptions •Easier to manage/orchestrate •Consistent in its results •Faster than humans 	Digital Innovation & Information Technology	Ward 1 Ward 10 Ward 2 Ward 3 Ward 4 Ward 5 Ward 6 Ward 7 Ward 8 Ward 9	Approved

Colin McClean	Career Blacksmith	In-House Lobbyist	KeepMovingForward.ca, (a subsidiary of GMJ Creative Hands, Inc.)		Approved	Training	Career and Self-Development Services for Youth, Young Adults and Adults	<p>Colin McClean's life purpose is to keep, "Challenging You to Grow, Overcome Obstacles and Achieve Your Goals". As a Career Blacksmith, Colin sculpts and forges learners' minds for success, using easy-to-follow systems that allow them to start building the lives they envision.</p> <p>His years of experience as an illustrator and career coach led to the publication of "A Funny Thing Happened On the Way To... My Career!", a creative self-help guide that uses humour to help job seekers hone the skills they need to find work, even in challenging economic times. Colin successfully applies these skills to the development of creative online and in-person workshops. He also facilitates workshops and delivers presentations for at-risk youth and young adults.</p> <p>In his course design and development, Colin incorporates theories of multiple intelligences to create fun games and exercises, which help diverse learners reach their goals and objectives in a safe and comfortable environment.</p> <p>Colin established ColinMcClean.com to expand his passion for helping others to excel. Using a combination of humour and practicality, he has delivered hundreds of workshops, coaching and mentoring sessions, including team development and retreat facilitation. He more recently launched KeepMovingForward.ca, to transfer his years of training experience to an online learning platform.</p> <p>Colin has an honours graduate diploma in Marketing and Business Administration, and a certification in Adult and Continuing Education and Teaching. He is also a Competent Toastmaster.</p>	Williams, Charmaine - City Wards 7 & 8	Ward 7 Ward 8	Approved

Daniel Shimski	Sr. Business Development Representative	In-House Lobbyist	Conduent, Inc. and its Affiliates	Conduent, Inc. and its Affiliates	Closed	Procurement	Speed and School Bus Cameras and systems	Conduent Inc. is a business process services company headquartered in the United States. It was formed in 2017 as a divestiture from Xerox. It has 93,000 employees in more than 40 countries. One of Conduent's services is to provide road safety Solutions. Including the following: Conduent installs, operates and maintains photo enforcement systems and solutions, including red light, speed and school bus cameras. No matter how large or small the jurisdiction, there is a photo enforcement system that can help maximize resources, deter careless driving and keep people safe. Conduent specializes in operations—not just equipment. Conduent can develop a customized photo enforcement solution that meets your operational and safety needs in a variety of areas. As an integrator, we unify the overall operation and provide a single point of contact with full responsibility for the program—making a complex road safety solution simple to execute. Conduent's photo enforcement systems include: Red light enforcement, Fixed and mobile speed enforcement, CrossSafe™ school bus photo enforcement, Work zone and school zone speed enforcement, Bus-only lane and railroad crossing enforcement. Each program is built on our expertise as an integrator and is supported by our superior back-end violations processing systems. Our proprietary violations management system and photo enforcement program ensure accurate data match, liability and certainty of enforcement. We offer end-to-end violations processing that offers one-stop convenience for ticket payment – in person, over the phone, or online. Approved	Infrastructure	Smart City sensing technology for public safety	We'd like to bring to the awareness of the City of Brampton a new technology from LED Roadway Lighting, our Tool-less Sensor Platform (TSP). This is a new system that allows a municipality's street lighting inventory to be used as an information network for a variety of different purposes. This system works with any current make of LED street lights; the technology uses NEMA standards applicable to any make of LED street lights. A very interesting component to the system is a new radar-based motion sensing technology that – in addition to turning the street lights ON and OFF, and setting dimming schedules for maximizing energy savings – can track and record the size, speed, quantity and direction of objects passing by (i.e., pedestrians, bicyclists, cars, buses, etc.). And the motion sensing is just one possibility – other potential applications include public-safety emergency flashers, environmental sensing, weather change detection, sound detection – it's essentially an endless list. In addition to controlling street lights, TSP provides the ideal platform for integrating Smart City sensing into a municipality's infrastructure.			Approved

Desiree Doerfler		In-House Lobbyist	DZIGN Interior Planning & Project Management Inc.		Approved	Planning & Development	To provide consulting services generally, for projects which may be specific to our services.	DZIGN is a design firm located in Brampton for almost 25 years. Our services are comprised of various aspects of design, specifically interior and exterior. We provide services throughout the GTA, throughout the United States, and Internationally. Our services throughout years have been provided to clients who are referred to us. Although having been located in Brampton these many years, we have not had the honour of having had many local referrals. We have been watching as the city grows culturally around us and would like to participate in that growth, and specifically in terms of providing design services. Brampton has been our chosen base of operations since inception, and it would be a welcome change for us to contribute to our communities' development and growth. For this reason, we would like to have discussions with key Brampton staff, to find out whether there are projects that we might participate in, and, what the process may be. Enea Kuka	Marketing Consultant	Consultant Lobbyist	ikubINFO		Approved	Infrastructure - Roads	Road Patrolling and Road Management System	On behalf of my employer, ikubINFO, I am recommending to the Public Works Department of The City of Brampton a new program called Road Patrol to provide them with managing and supervising their daily road operations easier, faster, and better. Road Patrol was created to help Public Works Directors, Roads Supervisors, and Patrollers to keep track of due inspections, due road deficiency repairs, past due inspections, and past due repairs. The patrollers can inspect the roads and report various deficiencies while the program saves the inspected roads and reported deficiencies to show them to the supervisor on a live dashboard. The program registers the time and day of inspected roads and reported deficiencies along with their GPS location, and this data is then displayed to the Supervisor to show them if they're being complaint with Municipal Standards.	Director, Road Mnt, Ops&Fleet		Approved

Ian Connerty	President	Consultant Lobbyist	Conduent	Gayle Alexander Associates Limited	Closed	Procurement	Speed and School Bus Cameras and systems	Conduent Inc. is a business process services company headquartered in the United States. It was formed in 2017 as a divestiture from Xerox. It has 93,000 employees in more than 40 countries. One of Conduent's services is to provide road safety Solutions. Including the following: Conduent installs, operates and maintains photo enforcement systems and solutions, including red light, speed and school bus cameras. No matter how large or small the jurisdiction, there is a photo enforcement system that can help maximize resources, deter careless driving and keep people safe. Conduent specializes in operations—not just equipment. Conduent can develop a customized photo enforcement solution that meets your operational and safety needs in a variety of areas. As an integrator, we unify the overall operation and provide a single point of contact with full responsibility for the program—making a complex road safety solution simple to execute. Conduent's photo enforcement systems include: Red light enforcement, Fixed and mobile speed enforcement, CrossSafe™ school bus photo enforcement, Work zone and school zone speed enforcement, Bus-only lane and railroad crossing enforcement. Each program is built on our expertise as an integrator and is supported by our superior back-end violations processing systems. Our proprietary violations management system and photo enforcement program ensure accurate data match, liability and certainty of enforcement. We offer end-to-end violations processing that offers one-stop convenience for ticket payment – in person, over the phone, or online. Imran Khan	Business Development Manager Canada	Voluntary Unpaid Lobbyist	FPT Infrastructure		Approved	Infrastructure - Roads	Asphalt and Concrete Repair products	<p>FPT Infrastructure manufactures a wide variety of bridge and road restoration and protection products including but not limited to liquid applied waterproofing assemblies, armored and non armored expansion joints, bridge bearings, hot mastic road repair materials, hot mastic concrete repair materials, and exposed slip resistant bridge deck waterproofing assemblies.</p> <p>We would like to conduct an information session with the City of Brampton that would showcase some of the unique products designed specifically for repairing potholes, and cold joint raveling in asphalt roadways. The product is called SamiScreed and is new to Canada. This product has an outstanding track record and performance history in the U.S road repair market and has performed exceptionally well even in cold climate, snow plow conditions such as Colorado and North Dakota (references available upon request). This solution is ideal for our market because the product does not require compaction, is self levelling, is waterproof, and remains moderately flexible which prevents the repair from cracking over time. It can also be installed year round, making it ideal for emergency winter road repair work. Samiscreed will outlast virtually any other repair materials available on the market and commonly lasts upwards of 7 years in service - even in the most demanding applications.</p> <p>We have outfitted our Canadian branch of FPT with their own mastic kettle so that we may provide demonstrations of the product and allow municipalities to monitor the installation first hand. FPT is not an installer of the product, though we will conduct demonstrations and test areas upon request of a client.</p> <p>FPT would like to co-ordinate a meeting to discuss the product in more depth and to help answer any questions that your team may have. Thanks for the opportunity to work with the City of Brampton.</p> <p>Sincerely, Imran Khan FPT Infrastructure Canada imran.khan@fptinfrastructure.com 416.432.3287</p>	Acting Director of Capital Works		Approved

Jacoby Joukema	Jacoby Joukema	Voluntary Unpaid Lobbyist	InFlow Machine Learning Inc.	InFlow Machine Learning Inc.	Approved	Information Technology	InFlow Machine Learning Demo Request	InFlow is a integrated platform for pedestrian counting and flow analysis. By using existing security infrastructure and cloud-computing InFlow offers the accuracy of existing systems with significantly more flexibility without requiring the installation of any new hardware or software. Furthermore, InFlow works indoors and outdoors allowing municipalities to gather statistics in rec centres and parks alike. Pedestrian counting and analytics has significant value for municipalities economic development, facility management, transportation, and security. InFlow Machine Learning Inc. (https://inflow.ml) reached out to Gary Collins after Co-Founder Jacoby Joukema met him at the farmers market earlier this summer and they discussed measuring the traffic of people throughout the market. After sending an email detailing the InFlow platform Gary followed up a few weeks later requesting a demo with a few representatives from different interested departments. Before scheduling a meeting we have been asked to fill out a Lobbying Profile. Additionally, we would like to declare a potential conflict of interest. Marcel Wieder	President and Chief Advocate		Peel Taxi Alliance	Aurora Strategy Group	Approved	Licences	Illegal, unlicensed taxi services offering ride sharing services	The Peel Taxi Alliance represents over 4,000 people working in the industry in both Brampton and Mississauga. The Alliance is concerned that ride sharing services that are unregulated, uninsured and unlicensed pose a threat to the public and the industry. The taxi industry continues to work within the framework of established Provincial and Municipal regulations. These regulations were put in place by municipalities to protect the public. Taxi operators pay the required commercial insurance, safety checks, and training programs to meet these regulations. In addition, the industry pays licensing fees and taxes that contribute to cover the expense of police and municipal enforcement personnel, who are required to enforce the laws and industry regulations.	Jeffrey, Linda - Mayor		Closed

Marvin Stewart	CEO/Owner	In-House Lobbyist	24/7 Kleen Inc		Approved	Emergency Planning and Services(including Fire)	Health and Safety Covid-19 reduction	24/7 Kleen's mission is to " Provide and promote healthy living amongst society " . The purpose of my service is to ensure a clean and healthy environment on the brampton public transit , due to the pandemic I feel that my company can provide the essential need to reduce the high number of cases the city continues to produce . The idea is to install motion / auto dispensers in each transit bus and with refills at an additional cost . The sanitizer that is being used is called QT- Scan 65% alcohol based which is provided from Qwartro RoyalPak 1870 Albino Road unit #3 , Etobicoke , Ontario M9W 5T2. Each dispenser contains a 1000 ml jug which is equivalent to 4 refills.I am proposing to provide each unit at the price of \$250.00 plus tax. per unit with an addition \$15.00 per refill or \$50.00 per unit and also I will provide installation free at cost. I am aware of the different check points such as BCC , Mount Pleasant , Heart Lake Plaza and The bus yard where most of the buses are stored overnight . That being said , I will have a formulated team to perform the task of installing all the dispensers on each bus. From personal experiences and my daughter having to make a daily commute on the transit , I feel unsafe of the individuals who commute with her that do not practice safety protocols to reduce the spread of Covid-19.	Director, Transit General Manager, Transit Manager, Maintenance Transit	Ward 1 Ward 10 Ward 2 Ward 3 Ward 4 Ward 5 Ward 6 Ward 7 Ward 8 Ward 9	Approved

Michael Bergoo		Consultant Lobbyist	ClimateView AB	ClimateView	Approved	Environment	ClimateOS software for climate action planning	I am writing from ClimateView, based in Sweden. Our objective is to help cities accelerate their climate and energy transition, and reach carbon neutrality faster. We work with millions of residents in cities such as London (UK), Cambridge, Mannheim (Germany) and Bern (Switzerland). We are now launching ClimateOS in Canada. ClimateOS is the world's first platform for cities to build Living Climate Action Plans that respond dynamically to your local needs, and lets you discover and execute your optimal pathway to net zero. We are currently putting together an exclusive pilot group with 5 leading cities. We thought that you and the City of Brampton could be interested in joining this pilot. Would you be available for a chat in the coming days? We would also like to hear more about your work in achieving your climate goals.	Supervisor, Environmental Planning		Approved

Mikyla Mosley	Business Development	Consultant Lobbyist	Usful Co.		Approved	Economic Development	Event Strategy and Production	We are an event strategy/experiential marketing company out of Toronto with experience building unique, buzz-generating events, planning and executing full conferences, booth design, as well as awards ceremonies and celebrations. We consult with clients to learn what the goal of their event or space-creation is, and then have our creative team strategize to ensure the KPIs and objectives are hit or exceeded. Devin Ramphal and I were speaking about events, as I used to manage one Brampton company's tech Meetups, which Devin used to attend with others from the City of Brampton's official tech meetup group as they were interested in how I managed to drum up 40+ people at each event. I have since left the company to do events full time, and as Devin and I were catching up recently, learned you may want to have a presence at Collision Conference this year. We can provide a unique presence for City of Brampton anywhere, really.	Sector Mgr, Innov&Technologies		Approved

Steve Ostrowski	CEO	In-House Lobbyist	Municipal Transit Solutions Inc.		Approved	Transit	Ultra Light Rail Transit Technology	MTS proposes to design engineer finance and construct an Ultra Light Rail transit system in place of the Queen Street BRT. ULRT is essentially an LRT that will operate in place of a BRT. The cost of the system will be approximately \$150M and it will be fully electrified with flash charging that will eliminate the need for the \$150M charging station for battery powered vehicles. This is proven technology and the lead engineering firm for MTS is RA Engineering of Newmarket. RAE was a significant contributor to the Hurontario LRT in the capacity of civil engineering, and arranged the 3P financing for it as well. Todd Townend	Director, Health Care Division	Consultant Lobbyist	Aerobiovac Canada	Aerobiovac Canada	Approved	Procurement	Aerobiotix Patented Air Disinfection Technology for Infection Prevention (COVID-19 Solution)	<p>The problem: HEPA filters are known to capture 99.97% of airborne particles as small as 0.3 microns but the airborne viruses and bacteria that spread and threaten our health are 60x - 300x smaller than 0.3 microns. This is the 0.03% HEPA filter don't capture. The pass through and remain alive and airborne. We destroy the 0.03% of all viruses and bacteria on the FIRST PASS to produce clean, sanitized, sterilized air.</p> <p>Aerobiotix has developed a suite of novel technologies for efficient biological elimination of airborne viruses, bacteria and spores to optimize indoor environments. Aerobiotix machines are the ONLY systems to have been FDA Class II tested/sanctioned on "LIVE COVID-19" by the Battelle Biomedical Research Centre in Oct. 2020.</p> <p>This patented technology has been scientifically proven to DESTROY airborne SARS-CoV-2 (COVID-19) and ALL pathogens on a SINGLE PASS.</p> <p>There are currently 17 Peer-Reviewed Studies and 4 White Papers on this technology: https://aerobiotix.com/case-studies-2/</p> <p>It was on the recommendation of the Honorable Ontario Minister, Michael Tibollo to get in contact with Mayor Brown as this is an IMMEDIATE SOLUTION to the COVID-19 challenges in Brampton/Peel. Mayor Brown responded earlier this afternoon and informed us that David Barrick and/or Bill Boyes will be booking a meeting with the appropriate staff. Kathryn Trojan Stelmaszynski sent an email directing us to complete this Lobbyist Register in order to meet with city staff.</p> <p>We look forward to setting a meeting date and presenting this technology as a solution to the current problems of this pandemic and any future potential pandemic.</p>	Brown, Patrick - Mayor Chief Administrative Officer Fire Chief	Ward 1 Ward 10 Ward 2 Ward 3 Ward 4 Ward 5 Ward 6 Ward 7	Approved
