WHEREAS effective April 18, 2020, the City of Brampton fast-tracked the implementation of bike lanes along the Vodden Street corridor through an interim installation, providing an alternative cycling option to recreational trails, and allowing cyclists to maintain physical distancing due to COVID-19; and

WHEREAS when the country begins its recovery from the COVID-19 pandemic, government stimulus spending will play a critical role in helping the economy recover; and

WHEREAS urban cycling infrastructure such as (but not limited to) on-road infrastructure holds a distinct advantage in terms of stimulus spending because projects can commence with shorter lead times and typically are not overly complex, which opens up bidding to the largest number of contractors; and

WHEREAS construction of some urban cycling infrastructure involves the modification of existing roads, such projects can continue later into the typical construction season, allowing Canadians to keep working for as long as possible; and

WHEREAS the City of Brampton is the 9th largest city in Canada and can lead by example by being a role model and champion for supporting active transportation as a key element in building sustainable and livable communities; and

WHEREAS the City of Brampton should actively continue to explore all funding opportunities that support the implementation of active transportation infrastructure and programs in support of the 2040 Vision.
