APPENDIX H – Site Photographs

1. EXECUTIVE SUMMARY

This report presents the findings of an Overview Phase One Environmental Site Assessment (ESA) for the proposed construction of the Clark Boulevard Extension and Improvements of Eastern Avenue in the City of Brampton, Regional Municipality of Peel, Ontario. The Overview Phase One ESA was prepared in general accordance with Ontario Regulation (O. Reg.) 153/04 in respect of the records review, Site Reconnaissance, and evaluation of information. However, interviews were not included in the scope of this Overview Phase One ESA.

The objectives of the Overview Phase One ESA were as follows:

- To determine the likelihood for the presence or absence of areas of potential environmental concern (APECs) where one or more contaminants of concern may have impacted the land, in or under the Project Alignment through an evaluation of the contributions of potentially contaminating activities (PCAs) in the Phase One Study Area; and
- To determine if a Phase Two ESA is necessary, and if so, to provide a basis for carrying out the Phase Two ESA.

The Project Alignment consists of the existing Eastern Avenue from Kennedy Road South to Hansen Road South that is approximately 0.5 km in length, and a proposed roadway from Hansen Road South to Rutherford Road South that is approximately 0.4 km in length and will connect to the existing western extent of Clark Boulevard.

Based on the information obtained through a review of available records and a Site Reconnaissance, the first developed use of Eastern Avenue from Kennedy Road South to Hansen Road South was a farmhouse (residential use) near the west end of the road as observed in the 1946 aerial photograph, followed by a roadway (community use) that was apparent in the 1965 aerial photograph. The first developed uses of 25 Rutherford Road South and 35 Rutherford Road South were industrial uses as observed in the 1974 aerial photograph. Prior to the first development uses, the Project Alignment was part of an agricultural and/or vacant field. The intended property use for the portion of existing Eastern Avenue will remain unchanged, however the property acquisitions along Eastern Avenue to accommodate the road widenings, as well as 25 and 35 Rutherford Road South for the proposed extension will result in property use changes from industrial to community land uses.

The findings of the Overview Phase One ESA identified a number of PCAs along the Project Alignment and in the Phase One Study Area. In general, the PCAs located at and upgradient to the Project Alignment, and proximal to the Project Alignment at cross-gradient or down-gradient

locations, were considered to have a potential to impact the soil and groundwater, and therefore, contribute to APECs within the Project Alignment. A total of seven APECs were identified along the Project Alignment.

The PCAs identified on the Phase One Property included fill materials that are anticipated to exist beneath Eastern Avenue and on the industrial properties developed at 25 and 35 Rutherford Road South, railway sidings with associated stained soils, manufacturing of cardboard containers and mattresses at 25 Rutherford Road South, and manufacturing of concrete products, preserved wood products and structural metal products at 35 Rutherford Road South. An autobody shop, and a private fuel outlet with storage tanks were also reported at 35 Rutherford Road South, as well as a spill of 400 L of diesel and 150 L of coolant in 2019.

The PCAs identified in the Phase One Study Area that were considered to contribute to APECs on the Project Alignment included various manufacturing activities; metal fabrication, plating, treatment and coating; dry cleaners; autobody shops; fuel storage tanks, trucking terminals, Brampton Hydro, waste generators and spills.

The Contaminants of Potential Concerns (COPCs) identified within the Project Alignment include metals and inorganics, polycyclic aromatic hydrocarbons (PAHs), petroleum hydrocarbons (PHCs), benzene, toluene, ethylbenzene, xylene (BTEX), volatile organic compounds (VOCs), acid/base/neutral compounds (ABNs), organochlorine pesticides (OCs), chlorophenols (CPs), 1,4-dioxane, and polychlorinated biphenyl's (PCBs).

Based on an evaluation of the information obtained during this Overview Phase One ESA, a Phase Two ESA involving an intrusive investigation is required to confirm or refute the presence of the COPCs in the soil and groundwater in relation to the PCAs and associated APECs.

Phase One and Two ESAs are also recommended for each conveyance involving property acquisition to accommodate the proposed road widenings and extension. In consideration of the era of the existing buildings in the Study Area, Designated and Hazardous Substance Surveys are recommended for the properties along Eastern Avenue where the Right of Way (ROW) required to widen the road includes a portion(s) of existing buildings(s), if any. In addition, asbestos may be present in the road which should be verified prior to disturbance during construction.

2. INTRODUCTION

This report presents the findings of an Overview Phase One Environmental Site Assessment (ESA) for the proposed Eastern Avenue Improvements from Kennedy Road South to Hansen Road South and the Clark Boulevard Extension from Hansen Road South to Rutherford Road South in the City of Brampton, Ontario (hereafter referred to as the Phase One Property or the Project Alignment). The Clark Boulevard Extension will be constructed on portions of two private properties between Hansen Road South and Rutherford Road South. The Eastern Avenue Improvements will primarily include roadway widenings and conveyances that may involve acquisitions of private properties, and connection to the Clark Boulevard Extension.

Thurber was retained by HDR Inc. to prepare the Overview Phase One ESA to support the Class Environmental Assessment (Class EA) of the above-mentioned roadway works. The report was prepared in general accordance with Ontario Regulation (O. Reg.) 153/04 in respect of the records review, Site Reconnaissance and evaluation of information. However, interviews were not included in the scope of this Overview Phase One ESA.

The purpose of the overview Phase One ESA is to provide a preliminary assessment of the likelihood for the presence or absence of potentially contaminated soils along the Project Alignment, as well as to provide a screening level summary of the historical and current potentially contaminating activities (PCAs) for the roadside properties along the Project Alignment that may need to be acquired to facilitate the proposed roadway design. In cases where property acquisitions are needed, separate Phase One ESAs may be required as part of the property transaction, and/or to satisfy requirements of laws, regulations, municipal bylaws and policies. This Overview Phase One ESA cannot be used, without modifications, as a supporting document for the submission of Record of Site Conditions.

It is a condition of this report that Thurber's performance of its professional services is subject to the attached Statement of Limitations and Conditions.

This Report uses the International System of Units (SI Units).

a. Phase One Property Information

The Phase One Property included the existing portion of Eastern Avenue from Kennedy Road South to Hansen Road South that is approximately 0.5 km in length, and a proposed roadway (i.e., Clark Boulevard Extension) from Hansen Road South to Rutherford Road South that is

approximately 0.4 km in length. The proposed roadway is to be located on two private properties - 35 Rutherford Road South and 25 Rutherford Road South.

Municipal Address	25 Rutherford Road South 35 Rutherford Road South NA (Eastern Avenue between Kennedy Road South and Hansen Road South)
Property Identification Number (PIN)	35 Rutherford Road South: 14032-0050; 14032-0061 25 Rutherford Road South: NA
Property Owner	35 Rutherford Road South: AP Infrastructure Solutions GP Inc. (lease to Precon Precast Limited) 25 Rutherford Road South: City of Brampton

b. Project Contacts

The Qualified Person (QP) of the Overview Phase One ESA is Mr. Peter Mann, P.Eng., QP_(ESA). Mr. Mann was retained by Ms. Michelle Mascarenhas, P.Eng. of HDR Inc. The contact information of the QP and Ms. Mascarenhas was provided in the following table.

Person who engaged the QP to conduct the Phase One ESA	Ms. Michelle Mascarenhas, P.Eng. Project Manager/ Engineer, HDR Inc. 100 York Boulevard, Suite 300, Richmond Hill ON L4B 1J8 Phone: 289-695-4613 Email: Michelle.Mascarenhas@hdrinc.com
Qualified Person	Peter Mann, P. Eng., QP _{ESA} Senior Geo-Environmental Engineer, Thurber Engineering Ltd. 103, 2010 Winston Park Drive, Oakville ON L6H 5R7 Phone: 647-954-1592 Email: pmann@thurber.ca

3. SCOPE OF INVESTIGATION

The Phase One ESA included the following components:

- A search of the available fire insurance plans (FIPs) for the Project Alignment and the adjacent properties. Review of available FIPs within the searched area.
- Review of EcoLog Environmental Risk Information Services Ltd. (ERIS) Report for the Project Alignment, which included searches of various federal, provincial and private source databases for records of potential environmental concern such as spills, former waste disposal sites, registration of underground/aboveground fuel storage tanks and environmental infractions.
- Obtain and review of city directories for the Project Alignment and the selected properties in the Phase One Study Area.
- An MECP Well Records Search in the Phase One Study Area.

- Review of relevant aerial photographs from 1940s to 2020s at an approximate ten-year interval, where available.
- Review of local topographic and geologic maps for the Study Area.
- Request for Freedom of Information (FOI) from the MECP for selected properties along and/or contain the Project Alignment.
- Obtain and review of historical title searches for selected properties along and/or contain the Project Alignment.
- A Site Reconnaissance of the Project Alignment and the Study Area from publicly accessible areas on August 3, 2021, and September 8, 2021, by Ms. Yidan Cui, P.Eng. of Thurber.

Thurber compiled, reviewed, interpreted and evaluated the data collected from the records review and Site Reconnaissance to identify the locations of PCAs on the Phase One Property and in the Phase One Study Area, and assessed the presence of Areas of Potential Environmental Concern (APECs) on the Phase One Property.

4. RECORDS REVIEW

a. General

(i) Determination of the Study Area

For the purposes of this report, the Study Area was determined to be an area with a 250 m radius from the boundaries of the Project Alignment, including adjacent properties that bisect the 250 m limits. An extension of the Study Area is not warranted as no property beyond 250 m was identified as having the potential to contribute to an APEC on the Phase One Property. The approximate boundaries of the Project Alignment and the Study Area are shown on Drawings 30427-1 and 30427-2.

(ii) First Developed Use Determination of the Project Area

Based on the information obtained through the available records review and Site Reconnaissance, the first developed use of Eastern Avenue from Kennedy Road South to Hansen Road South was a farmhouse (residential use) near the west end of the road as observed in the 1946 aerial photograph, followed by a roadway (community use) as observed in the 1965 aerial photograph.

The first developed uses of 25 Rutherford Road South and 35 Rutherford Road South consisted of industrial plants as observed in the 1974 aerial photograph. Prior to the first development,

this portion of the Project Alignment was part of agricultural and/or vacant fields as observed in the 1946, 1954 and 1965 aerial photographs.

(iii) Fire Insurance Plans

A search of the Fire Insurance Plans (FIPs) was conducted by Opta Information Intelligence – Enviroscan at the request of Thurber. Eight Fire maps from the 1970/1971 Volume were obtained for review. No FIPs earlier than 1970/1971 were available for the Project Alignment or the Study Area. The Opta Report is presented in Appendix A. A description of the PCAs identified in the FIPs is provided in the following table.

FIP No. (Depicted Area)	PCAs identified on the Firemap
Firemaps for Phase One Property	
<p><u>(1971) Volume: Brampton Firemap: 38</u> (19, 25 and 35 Rutherford Rd. S)</p>	<p>-25 Rutherford Rd. S: Manufacturing of cardboard containers (Kirk Containers Ltd.) -35 Rutherford Rd. S: Manufacturing of concrete products (Pre-Con Ltd.). One underground gasoline tank.</p> <p>Other observations on the Phase One Property: The creek that flows along the southwest property boundary of 25 Rutherford Rd. S existed and the channel appeared consistent with the present-day configuration. The building for Kirk Containers occupied the majority of the land at 25 Rutherford Rd. S and appeared to be located directly on the proposed Clark Boulevard Extension. To the south of the creek (and proposed Clark Blvd. Extension), a main building and two smaller buildings for Pre-Con existed at 35 Rutherford Rd. S. The gasoline tank was located on the south side of the main building.</p>
Firemaps for the Study Area	
<p><u>(1971) Volume: Brampton Firemap: 25</u> (Northwest and Southwest quadrant of the intersection of Queen St. E and Hansen Rd.)</p>	<p>-241 Queen St. E: Autobody shop -243 Queen St. E: Boats and motors manufacturing -245 Queen St. E: Plastic manufacturing</p>
<p><u>(1970) Volume: Brampton Firemap: 27</u> (East of Kennedy Rd. S between Queen St. E and Eastern Ave.)</p>	<p>-68 Eastern Ave.: Rubber manufacturing (General Latex and Chemical Ltd.). Three pole-mounted transformers near the road. -Railway sidings oriented perpendicular to Eastern Ave. on the east side of 68 Eastern Ave. -20 Kennedy Rd. S: An autobody shop with an underground gasoline tank -233 Queen St. E: Cleaners (possible dry cleaner)</p>
<p><u>(1971) Volume: Brampton Firemap: 28</u> (East side of Hansen Rd. S between Queen St. E and the proposed Clark Blvd. Extension)</p>	<p>-10 Hansen Rd. S: An autobody shop -14 Hansen Rd. S: An autobody shop -16 Hansen Rd. S: Conveyor manufacturing -249 Queen St. E: An autobody shop -253 Queen St. E: Auto parts manufacturing -255 Queen St. E: Sterilizer and hospital equipment manufacturing</p>

FIP No. (Depicted Area)	PCAs identified on the Firemap
(1971) Volume: Brampton Firemap: 29 (Northwest and southwest quadrant of the intersection of Queen St. E and Rutherford Rd.)	-19 Rutherford Rd.: Automobile parts manufacturing (Canada Ferro) -263 Queen St. E: Manufacturing of safes and security equipment
(1971) Volume: Brampton Firemap: 36 (East of Kennedy Rd. S between Eastern Ave. and Orenda Rd.)	-63 Eastern Ave.: An underground gasoline tank located near the road. -69 Eastern Ave.: Brampton Hydro with one underground gasoline tank and a garage -22, 24, 26 and 28 Kennedy Rd. S: Autobody shops -30 Kennedy Rd. S: Metal plating (Union screen plate Co. Ltd.)
(1971) Volume: Brampton Firemap: 37 (West of Hansen Rd. S to the north and south of Eastern Ave.)	-75 Eastern Ave.: Foundry (Designed Precision Casting Ltd.) -27 Hansen Rd. S: Manufacturing of industrial washers, ironers and bakery equipment
(1971) Volume: Brampton Firemap: 39 (East of Rutherford Rd. S to the north and south of Clark Blvd. [formerly named as Davidson Rd.]	-28 Rutherford Rd. S: Metal welding and fabricating -32 Rutherford Rd. S: Manufacturing of concrete planters and fountains -52 Rutherford Rd. S: Two underground gasoline tanks -36 Rutherford Rd. S: Two underground gasoline tank (this property was labelled as 1 Davidson Rd. on the Fairmap) -19 Clark Blvd.: Manufacturing of concrete slabs with one transformer oil tank. -34 Clark Blvd.: Manufacturing of fire fighting and safety equipment (Foundry)

A summary of all the PCAs identified on the Phase One Property and within the Study Area is provided as below:

On-site PCAs:

According to the 1971 FIP, 25 Rutherford Road South was occupied by a manufacturer of cardboard containers; and 35 Rutherford Road South was occupied by a manufacturer of concrete products with an underground gasoline tank. As such, the following PCAs were identified on the proposed Clark Boulevard Extension:

- **PCA#12: Concrete, Cement and Lime Manufacturing**
- **PCA#28: Gasoline and Associated Products Storage in Fixed Tanks**
- **PCA#45: Pulp, Paper and Paperboard Manufacturing and Processing**

Off-site PCAs:

- **PCA#7: Boat Manufacturing**
 - Manufacturing of boats and motors at 243 Queen Street East.

- **PCA#10: Commercial Autobody Shops**

Autobody shops at the following locations:

- Eastern Avenue: 69
- Hansen Road South: 10, 14
- Kennedy Road South: 20, 22, 24, 26, 28
- Queen Street East: 241, 249

- **PCA#12: Concrete, Cement and Lime Manufacturing**

- Manufacturing of concrete slabs at 19 Clark Boulevard, concrete planters, and fountains at 32 Rutherford Road South.

- **PCA#18: Electricity Generation, Transformation and Power Stations**

- Brampton Hydro at 69 Eastern Avenue.

- **PCA#28: Gasoline and Associated Products Storage in Fixed Tanks**

Underground gasoline tanks were identified at the following locations:

- Eastern Avenue: 63, 69
- Kennedy Road South: 20
- Rutherford Road South: 36, 52

- **PCA#33: Metal Treatment, Coating, Plating and Finishing**

- Manufacturing of industrial washers, ironers and bakery equipment at 27 Hansen Road South; manufacturing of safes and security equipment at 263 Queen Street East; Metal plating at 30 Kennedy Road South.

- **PCA#34: Metal Fabrication**

- Foundries at 75 Eastern Avenue and 255 Queen Street East; manufacturing of firefighting and safety equipment at 34 Clark Boulevard, conveyors at 16 Hansen Road South; metal welding and fabricating at 28 Rutherford Road South; manufacturing of safes and security equipment at 263 Queen Street East; and manufacturing of sterilizer and hospital equipment at 255 Queen Street East.

- **PCA#37: Operation of Dry-Cleaning Equipment (where chemicals are used)**

- A possible dry cleaner at 233 Queen Street East.

- **PCA#43: Plastics (including Fibreglass) Manufacturing and Processing**

- Plastic manufacturing at 245 Queen Street East.

- **PCA#46: Rail Yards, Tracks and Spurs**
 - Rail sidings existed perpendicular to Eastern Avenue between 69 Eastern Avenue and 73 Eastern Avenue.
- **PCA#47: Rubber Manufacturing and Processing**
 - Rubber manufacturing at 68 Eastern Avenue.
- **PCA#55: Transformer Manufacturing, Processing and Use**
 - One transformer oil tank at 19 Clark Boulevard.
- **PCA#57: Vehicles and Associated Parts Manufacturing**
 - Manufacturing of auto parts at 253 Queen Street East and 19 Rutherford Road South.

(iv) Chain of Title

Historical Land Title Search

Historical land title searches were ordered for 35 Rutherford Road South and 19 Rutherford Road South. Copies of the title search reports are provided in Appendix B.

A review of the title search reports indicated that the property at 35 Rutherford Road South was occupied by private owners from 1837 to 1962. Since 1962, the property was transferred multiple times between Pre-Con Limited and various industrial occupants. The occupants included St. Marys Cement Limited, Blue Circle Canada Inc. and AP Infrastructure Solutions GP Inc. (formerly Armtec GP Inc.). The present property owner is AP Infrastructure Solutions GP Inc., and the present tenant is Precon Precast Limited.

The property at 19 Rutherford Road South was listed with private owners from 1837 to 1957. Since 1957, the property was owned by the Corporation of the Town of Brampton (1957-1963), Baden Realty Limited (1963 to 1982), Abacus Cities Ltd. (1982 – 1984), and Kendall A.G. (1984-Present).

Some of the industrial owners at 35 Rutherford Road South were identified in the EcoLog ERIS review. No additional PCAs were identified through a review of the title search reports.

City Directories

A search of city directories for the Phase One Property and the Study Area was conducted by ERIS at the request of Thurber. Due to the closure of libraries during the COVID-19 pandemic, the search for the Project Area was restricted to an available in-house database of ERIS. City Directories from 1958/60 to 2000 were reviewed for the Phase One Property and the properties in the Study Area at an approximate 5-to-10-year interval where listings were available. The ERIS City Directory Report is presented in Appendix C. The search results are summarized in the following table.

Address	Listings of Interest	PCAs
12 Clark Blvd.	-Access Waste Management	#58 Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners

(v) Environmental Reports

No Environmental reports for the Project Area were made available to Thurber for review.

b. Environmental Source Information

(i) EcoLog ERIS Report

An EcoLog database report was ordered from ERIS to obtain environmental source information for the Project Alignment and the Study Area. The EcoLog ERIS report provides a search of over seventy databases maintained by federal, provincial, and private sectors. Examples of the databases include fuel storage tanks by Technical Standards and Safety Authority (TSSA), Ontario Regulation 347 Waste Generators and Receivers Summary, National PCB Inventory, and the National Pollutant Release Inventory. A copy of the EcoLog ERIS Report is presented in Appendix D. A summary of the significant findings of the EcoLog ERIS report is provided in the following table:

Location	Findings	PCA No. (Table D, Schedule 2, O.Reg. 153/04)

Location	Findings	PCA No. (Table D, Schedule 2, O.Reg. 153/04)
67 Eastern Ave.	Alectra Utilities Corporation was registered as a waste generator (ON7036874) of waste oils and sludges from approximately 2018 to 2021.	-
68 Eastern Ave.	<p>General Latex Canada Inc. was registered in the National Pollutant Release Inventory for releasing HCFC, Methylenebis, Polymeric diphenylmethane diisocyanate, and ethylene glycol. General Latex was a manufacturer of rubber products. The company was registered as a waste generator (ON2301800) from approximately 1997 to 2000. The wastes generated included PCB's, other specified inorganics, inorganic laboratory chemicals, aromatic solvents, latex wastes, waste oils and lubricants, organic laboratory chemicals, and amines.</p> <p>Textile Rubber and Chemical Company was approved for air emission from latex processing exhaust systems. TRCC Canada was listed in the Chemical Register for manufacturing and/or distribute chemicals. The company was registered as a waste generator (ON4708040) of latex wastes, petroleum distillates and organic laboratory wastes from approximately 2002 to 2016. The company was a manufacturer of adhesives and rubber products.</p> <p>Icynene Inc. was registered as waste generator (ON3804030) in 2001. The wastes generated included polymeric resins, aliphatic solvents and residues, and polymeric resins.</p> <p>Elite Materials Corp was registered as a waste generator (ON3952243) in 2021. The wastes generated included polymeric resins and waste organic chemicals.</p> <p>Multiple tank records were available at the location.</p> <p>Dow Chemical Canada was reported as a manufacturer of foam products. Dow was registered as a waste generator (ON0009115) from approximately 2001 to 2004. The wastes generated included light fuels, latex wastes, polymeric wastes, PCB's, waste oils and lubricants, organic laboratory chemicals, amines, other specified inorganics, inorganic laboratory chemicals, aromatic solvents, polymeric resins, and aliphatic solvents.</p> <p>A spill of 225 L of diesel in 1996.</p> <p>A minor spill of textile rubber in 2003.</p>	#2 #26 #28 #47 #Other-SPL- 225 L of diesel in 1996.
69 Eastern Ave.	<p>The Regional Municipality of Peel was registered as a waste generator (ON0148304) from approximately 1986 to 2001. The wastes generated included petroleum distillates, oil skimmings and sludges, waste oils and lubricants, and light fuels.</p> <p>WCI Wood Conversion Inc. was registered as a waste generator (ON1380900) from approximately 1990 to 2001. The wastes generated included petroleum distillates, waste oils and lubricants. The company was a manufacturer of wooden products.</p> <p>New Tech Auto Body Repairs Ltd. was approved for an automotive refinishing facility.</p> <p>A spill of unknown amount of diesel to gravel area in 1994.</p> <p>A spill of 85 L of motor oil in 2013.</p>	#10 #Other-SPL- unknown amount of diesel in 1994 and 85 L of motor oil in 2013.
73 Eastern Ave.	Multiple tank records were reported at Wetmore Welding.	#28

Location	Findings	PCA No. (Table D, Schedule 2, O.Reg. 153/04)
75 Eastern Ave.	Designed Precision Castings was reported as a foundry. The company was listed in the National Pollutant Release Inventory for releasing chromium. The company was approved for air emissions. The company was also registered as a waste generator (ON0529900) from approximately 1986 to 2021. The wastes generated included aliphatic solvents, acid waste-other metals, and alkaline wastes – other metals, inorganic laboratory chemicals, petroleum distillates, halogenated solvents, waste oils and lubricants, organic laboratory chemicals, inorganic sludges, slurries or solids, inert organic wastes, photo processing wastes, and compressed cylinders.	#34
72 Orenda Rd.	Komline-Sanderson Limited was reported as a manufacturer of machinery. The company was registered as a waste generator (ON1748700) from approximately 1993 to 2004. The wastes generated included neutralized wastes, inorganic laboratory chemicals, petroleum distillates, latex wastes, waste oils and lubricants, and organic laboratory chemicals.	#33
76 Orenda Rd.	Multiple tank records were available at the location. Bell Canada was registered as a waste generator (ON0033911) from approximately 1986 to 2005. The wastes generated included alkaline wastes, neutralized wastes, aliphatic solvents, petroleum distillates, light fuels, oil skimmings and sludges, waste oils and lubricants, organic laboratory chemicals, waste compressed gases, and acid waste – heavy metals. Solda Pools Ltd. was registered as a waste generator (ON2541400) from approximately 1999 to 2013. The wastes generated included waste oils and lubricants. The company was reported as a speciality trade contractor.	#28
79 Eastern Ave.	Harold's Automotive Services was registered as a waste generator (ON1243901) of alkaline wastes – other metals, from approximately 1992 to 1998. Harold's Automotive was a manufacturer of vehicle engines. Dionisio Auto Collision Ltd. was approved for air emission from paints spray booths.	#10 #57
90 Eastern Ave.	Disposal Waste Inc. was registered as a waste generator (ON3930360) of waste crankcase oils and lubricants in 2021.	-
9 Hansen Rd. South	A spill of 68 L of Glycol to ground in 2002. Colony Mercury Sales Body Shop was registered as a waste generator (ON0058600) from approximately 1986 to 1994. Stephenson's Rent-All was registered as a waste generator (ON0467651) from approximately 2001 to 2005. The wastes generated included aliphatic solvents, petroleum distillates, light fuels, halogenated solvents, oil skimmings and sludges, and waste oils and lubricants. Stephenson's Rent-All was a machinery rental company. Expired fuel tanks were reported at the location. 2233784 Ontario Inc. was registered as a pesticide's vendor.	#28 #40 #10
10 Hansen Rd. South	Brampton Vee World Motors Ltd. was approved for air emission from paints spray booths. Brampton Vee World Motors was a manufacturer of vehicle engine and engine parts.	#57
13 Hansen Rd. South	Rogers Cable Inc. was approved for air emission from an emergency diesel generator.	#28
16 Hansen Rd. South	Brampton Auto was registered as a waste generator (ON1025500) of alkaline wastes – other metals from approximately 1992 to 1998. Brampton Auto was a manufacturer of vehicle engines.	#57

Location	Findings	PCA No. (Table D, Schedule 2, O.Reg. 153/04)
25 Hansen Rd. South	GCI Equipment Inc. was registered as a waste generator (ON7650890) of waste crankcase oils and lubricants from approximately 2013 to 2021. GCI Equipment was a site preparation contractor. Clarkson Osborn Tools was reported as a manufacturer of cutting tools, machine tool accessories and measuring devices, and a wholesaler and distributor of machinery and equipment.	#33
27 Hansen Rd. South	Industrial Containers Limited was registered in the National Pollutant Release Inventory for releasing Methyl Ethyl Ketone, particulate matter, 2-Butoxyethanol, VOCs and Xylenes. Industrial Containers Ltd. was a manufacturer of steel products from purchased steel, and metal containers. The company was also registered as a waste generator (ON0223500) from approximately 1986 to 2008. The wastes generated included paints, pigments, coating residues, aromatic solvents, aliphatic solvents, waste oils and lubricants. The company was approved for industrial air emissions. V4U Logistic Inc. was registered as a waste generator (ON4081246) in 2021. The wastes generated included waste oils and sludges, aliphatic solvents and residues, and waste oils and lubricants.	#11 #33
29 Hansen Rd. South	T.M.J. Specialty Tool and Design was a manufacturer of dies and tools, jigs and fixtures, and industrial molds.	#33
31 Hansen Rd. South	Ivers-Lee Limited was a manufacturer of packaging paper and plastics. The company was registered as a waste generator (ON1056700) from approximately 1988 to 2010. The wastes generated included organic laboratory chemicals, halogenated solvents, pharmaceuticals, detergents, soaps, alkaline wastes, waste oils and lubricants, paints, pigments, coating residues, inorganic laboratory chemicals, aliphatic solvents, and petroleum distillates. The company was approved for air emissions. Jones Contract Packaging Services was registered as a waste generator (ON1056700) in 2013. The wastes generated included waste oils and lubricants, alkaline wastes, halogenated solvents, detergents, soaps, organic laboratory chemicals, petroleum distillates, pharmaceuticals, inorganic laboratory chemicals, acid waste, paints, pigments, coating residues, and aliphatic solvents.	#43 #45

Location	Findings	PCA No. (Table D, Schedule 2, O.Reg. 153/04)
34 Hansen Rd. South	<p>V R Furniture Inc. was a manufacturer of wood household furniture. VR Furniture was registered as a waste generator (ON7318779) from approximately 2002 to 2004. The wastes generated included aromatic solvents and petroleum distillates.</p> <p>Bramsen Holdings Inc. was registered as a waste generator (ON2613674) in 2003 and 2004. The wastes generated were unknown.</p> <p>American Air was registered as a waste generator (ON1418400) from approximately 1992 to 1998. The wastes generated included aromatic solvents, petroleum distillates, waste oils and lubricants, and graphic art wastes. American Air was a manufacturer of unknown products.</p> <p>Freedom Group Inc. was registered as a waste generator (ON9339756) from approximately 2012 to 2015. The wastes generated included waste oils and lubricants. Freedom Group was a manufacturer of wood containers and pallets.</p> <p>Roberts Company Canada Limited was registered as a waste generator (ON7468692) from approximately 2016 to 2021. The wastes generated included latex wastes, amines, polymeric resins, aliphatic solvents, acid waste-heavy metals, organic laboratory chemicals, waste oils and lubricants, paints, pigments, coating residues, and graphic art wastes. The company was a wholesaler and distributor of building supplies, as well as a manufacturer of paints, coating, and adhesives. The company was also registered in the National Pollutant Release Inventory. The pollutants released were not reported.</p>	#2 #39
37 Hansen Rd. South	Industrial Containers Limited was registered in the National Pollutant Release Inventory for releasing Methyl Ethyl Ketone.	#43
38 Hansen Rd. South	<p>Finoll Recycling Ltd. was a manufacturer of stone products, asphalt paving mixtures, blocks, asphalt felts and coatings.</p> <p>Cummings Signs of Canada Limited was registered as a waste generator (ON0560500) from approximately 1986 to 1990. The wastes generated included aromatic solvents, waste oils and lubricants. The company was a manufacturer of signs.</p> <p>Aadco Vehicle Disposal Services (2157437 ONT Inc.) was registered as a waste generator (ON6725541) from approximately 2005 to 2021. The wastes generated included aliphatic solvents, petroleum distillates, waste oils and lubricants. The company was in the automobile wrecking and recycling industry.</p>	#5 #34 #49
205 Queen St. East	A Record of Site Condition was filed in 2020.	-
209 Queen St. East	<p>Multiple fuel tank records were available at the location.</p> <p>Mattamy was registered as a waste generator (ON5243826) of light fuels in 2005.</p> <p>A Record of Site Condition was filed in 2007.</p>	#28
228 Queen St. East	Bulk storage of PCB's was reported at the location. A total of approximately 20,000 kg of material containing 50 ppm to 10,000 ppm of PCB's stored for disposal. A total of 400 kg of ballasts containing over 1000 ppm of PCB's stored for disposal.	#8
230 Queen St. East	<p>Shell gas station was reported at the location.</p> <p>A leakage of gas was reported in 1989.</p> <p>Multiple tank records were available at the location.</p>	#28 #Other – release of gas

Location	Findings	PCA No. (Table D, Schedule 2, O.Reg. 153/04)
241 Queen St. East	A waste oil furnace was reported at the location. Multiple tanks records were reported at the location. John Logan Chevolds was a repair garage and registered as a waste generator (ON2016100) from approximately 1995 to 2001. The wastes generated included waste oils and lubricants. Air emissions were approved for paints spray booths. A Record of Site Condition was filed in 2018.	#10 #28
243 Queen St. East	Jakalo Investments was registered as a waste generator (ON8931600) of oil skimmings and sludges in 2013. The company was a bulk liquid trucking company. Toronto Car Sale and Auto Service was registered as a waste generator (ON2924467) of oil skimmings and sludges in 2013.	#10 #11
245 Queen St. East	Heart and Stroke Foundation was registered as a waste generator (ON9511497) of pathological wastes. Rivlawn Holdings was registered as a waste generator (ON5490540) of emulsified oils. Rivlawn leased non-residential buildings.	-
247 Queen St. East	Priestly Demolition Inc. was registered as a waste generator (ON7406576) of waste oils and lubricants. The company was a site preparation contractor. A Record of Site Condition was filed in 2011.	-
253 Queen St. East	123 Computer Warehouse Inc. was a repair store for electronic equipment, and a wholesaler and distributor of computer and software. Sears Canada Inc. was registered as a waste generator (ON9442409) in 2004 and 2005. The wastes generated included inorganic and organic laboratory chemicals, paints, pigments and coating residues. The company was described as an electronics store. Homedale-Eagle Corporation was registered as a waste generator (ON5877869) of halogenated solvents from approximately 2010 to 2021. The company was a real estate management company.	#58 (includes use of halogenated solvents for more than 10 years)
255 Queen St. East	Counterfitters of Ontario Inc. was reported as a manufacturer of non-metallic mineral products. Amsco Canada Limited was registered as a waste generator (ON0026100) from approximately 1986 to 1998. The wastes generated included acid waste-other metals, halogenated solvents, emulsified oils, and waste compressed gases.	#58
6 Rutherford Rd. South	A Certificate of Approval was issued to Brampton Auto Centre for industrial air emission from a waste oil furnace.	#28
12 Rutherford Rd. South	Thermo Electric Canada Ltd. was a manufacturer of measuring and controlling devices. The company was registered as a waste generator (ON0898700) from approximately 1986 to 2010. The wastes generated included petroleum distillates, halogenated solvents and emulsified oils.	#19
16 Rutherford Rd. South	Reagency Systems Corp. was reported as a manufacturer of magnetic and optical recording media. SB Simpson Group Inc. was registered as a waste generator (ON8327104) in 2018 and 2021. The wastes generated included wastes from the use of pigments, coatings and paints, waste crankcase oils and lubricants, waste organic chemicals, amines, and waste compressed gases including cylinders.	#33

Location	Findings	PCA No. (Table D, Schedule 2, O.Reg. 153/04)
19 Rutherford Rd. South	<p>Brampton Lumber Home Hardware was registered as a pesticide's vendor. Signage and Lighting Systems was a manufacturer of signs, electrical equipment and components. The company was approved for air emissions. The company was also registered as a waste generator (ON8811685) from approximately 2014 to 2016. The wastes generated included paints, pigments, coating residues and aromatic solvents.</p> <p>C-max was registered as a waste generator (ON8257318) from 2006 to 2018. The wastes generated included paints, pigments, coating residues, and aromatic solvents. The company was approved for air emissions. A review of the EcoLog database report from ERIS identified the following PCAs in the Study Area:

On-site PCAs:

The Clark Boulevard Extension from Hansen Road to Rutherford Road South was occupied by 25 Rutherford Road South and 35 Rutherford South. 25 Rutherford Road South was reported with a former mattress manufacturer. Numerous records were available for 35 Rutherford Road South. According to the records reviewed, the property was used as a manufacturing plant for concrete products, preserved wood products. An on-site industrial sewage system, an autobody shop, a self-service gas station and multiple fuel storage tanks were reported at the property. Spills of 400 liters of diesel and 150 liters of coolant were reported in 2019. The specific locations of the gas station, fuel storage tanks or spills were unknown.

The above-noted activities include the following PCAs:

- **PCA #10: Commercial Autobody Shops**
- **PCA# 12: Concrete, Cement and Lime Manufacturing**
- **PCA# 28: Gasoline and Associated Products Storage in Fixed Tanks**
- **PCA#54: Textile Manufacturing and Processing**
- **PCA# 59: Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products**
- **PCA# Other: SPL-400 L of diesel and 150 L of coolant in 2019**

Off-site PCAs:

According to the records reviewed, numerous autobody shops, various manufacturing activities, fuel storage tanks and other PCAs existed in the Study Area. The off-site PCAs identified in the Study Area are summarized as follows:

- **PCA# 2: Adhesives and Resins Manufacturing, Processing and Bulk Storage**
 - Manufacturing of adhesives at 68 Eastern Avenue and 34 Hansen Road South.

- **PCA# 5: Asphalt and Bitumen Manufacturing**
 - Manufacturing of asphalts at 38 Hansen Road South.

- **PCA# 8: Chemical Manufacturing, Processing and Bulk Storage**
 - Bulk storage of PCBs at 228 Queen Street East.

- **PCA# 10: Commercial Autobody Shops**

Autobody shops and/or vehicle repair and maintenance shops at the following locations:

 - Eastern Avenue: 69, 79
 - Queen Street East: 241, 243
 - Rutherford Road South: 19, 28, 52
 - Clark Boulevard: 12, 19, 21
 - Kennedy Road South: 18, 26, 30
 - Hansen Road South: 9

- **PCA# 11: Commercial Trucking and Container Terminals**
 - A trucking company at 27 Hansen Road South and a bulk liquid trucking company at 243 Queen Street East

- **PCA# 12: Concrete, Cement and Lime Manufacturing**
 - Manufacturing of concrete products at 32 Rutherford Road South.

- **PCA# 19: Electronic and Computer Equipment Manufacturing**
 - Manufacturing of measuring and controlling devices at 12 Rutherford Road South and manufacturing of electronic components at 21 Clark Boulevard.

- **PCA# 26: Foam and Expanded Foam Manufacturing and Processing**
 - Manufacturing of foam products at 68 Eastern Avenue.

- **PCA# 28: Gasoline and Associated Products Storage in Fixed Tanks**

One or more fuel storage tanks were reported at the following locations:

 - Eastern Avenue: 68, 73
 - Orenda Road: 76
 - Hansen Road South: 9, 13
 - Queen Street East: 209, 230, 241
 - Rutherford Road South: 19, 35, 52
 - Kennedy Road South: 1, 18, 24, 26, 30
 - In addition, one or more waste oil furnaces were reported at 241 Queen Street East, 6 Rutherford Road South, and 12 Clark Boulevard. Waste oil tanks were likely to be associated with the furnaces.

- **PCA# 33: Metal Treatment, Coating, Plating and Finishing**
 - Manufacturing of machinery at 72 Orenda Road, tools at 25 Hansen Road South, metal containers at 27 Hansen Road South, Industrial molds at 29 Hansen Road South, institutional furniture at 32 Rutherford Road South, measuring and controlling devices (possible thermostats) at 16 Rutherford Road South.
- **PCA# 34: Metal Fabrication**
 - Foundries were reported at 75 Eastern Avenue. Manufacturing of signs at 19 Rutherford Road South, 38 Hansen Road South and 21 Clark Boulevard.
- **PCA# 39: Paints Manufacturing, Processing and Bulk Storage**
 - Manufacturing of paints at 34 Hansen Road South, and paints and varnishes at 24A Rutherford Road South.
- **PCA# 40: Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications**
 - Pesticide's vendors were reported at 9 Hansen Road South, 19 Rutherford Road South, and 1 Kennedy Road South.
- **PCA# 43: Plastics (including Fibreglass) Manufacturing and Processing**
 - Manufacturing of plastic bags at 31 Hansen Road South, and containers at 37 Hansen Road South.
- **PCA# 45: Pulp, Paper and Paperboard Manufacturing and Processing**
 - Manufacturing of paper bags at 31 Hansen Road South.
- **PCA# 47: Rubber Manufacturing and Processing**
 - Manufacturing of rubber products at 68 Eastern Avenue.
- **PCA# 49: Salvage Yard, including automobile wrecking**
 - An automobile wrecking yard was reported at 38 Hansen Road South.
- **PCA# 57: Vehicles and Associated Parts Manufacturing**
 - Manufacturing of vehicle parts at 79 Eastern Avenue, 10 Hansen Road South, 16 Hansen Road South, 5 Kennedy Road South, and 30A Kennedy Road South.

- **PCA# 58: Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners**
 - A waste storage yard was reported at 19 Clark Boulevard. Waste management was approved at 19 Rutherford Road South. Generation (and potential storage and management) of halogenated solvents at a real estate company at 253 Queen Street East. Generation of wastes including halogenated solvents at 255 Queen Street East.
- **PCA# Other: Spills**
 - Spills of 1 L of transformer oil in 2009 at 24 McCallum Court, 1000 L of diesel in 2012 at 19 Rutherford Road South, 205 L of on PCB transformer oil in 2008 at 11 McCallum Court, 225 L of diesel in 1996 at 68 Eastern Avenue, 30 L of hydraulic oil in 2017 at 36 Rutherford Road South, 400 L of transformer oil in 2017 at 21 Clark Boulevard, 50 L of diesel in 2011 at 33 Kennedy Road South, unknown amount of diesel in 1994 and 85 L of motor oil in 2013 at 69 Eastern Avenue, unknown quantity of alkyd rust proof resin in 1993 at 52 Rutherford Road South, unknown quantity of diesel in 2016 at 12 Clark Boulevard, gasoline leakage at 230 Queen Street East, and unknown quantity of waste oil in 1994 at 30 Kennedy Road South.
- **PCA# Other:** Maintenance of machinery and equipment at a rental supply company at 36 Rutherford Road South.

(ii) Freedom of Information Search

Freedom of Information (FOI) requests to the Ministry of Environment, Conservation and Parks (MECP) were submitted for 25 Rutherford Road South and 35 Rutherford Road South. The typical processing time for the FOI request is 30 days, however, due to the COVID-19 outbreak, there may be a delay with the search and response.

At the time of preparing this report, no records have been received. Upon receipt, the records will be reviewed and the significant findings, if any, will be issued under separate cover.

c. Physical Setting Sources

(i) Aerial Photographs

A search of aerial photographs was conducted by EcoLog ERIS at the request of Thurber. Various photo sources, such as National Air Photo Library (NAPL) and MAXAR Imagery, were included in the ERIS search. The search results indicated that the earliest photo available for review was dated 1946. From the 1940s, photographs available for review were dated 1954, 1965, 1974, 1980, 1995 and 2015. A supplementary review of the most recent aerial imagery

for 2021 was conducted on Google Maps. A copy of the EcoLog ERIS Aerial Photo Report is presented in Appendix E. A summary of the observations made on the reviewed photographs is provided in the following table.

Year	Project Alignment	Phase I Study Area
1946	The majority of the Project Alignment appeared to consist of agricultural or vacant fields, except near the west end which was occupied by a farmhouse.	The majority of the Study Area appeared to comprise agricultural or vacant fields. The southwest quadrant of the intersection of Queen St. East and Kennedy Rd. South was developed with some building structures that appeared to be residential houses.
1954	No significant changes observed since 1946.	No significant changes observed since 1946.
1965	Eastern Avenue was developed from Kennedy Rd. South to Hansen Rd. South. The properties at 25 Rutherford Rd. South and 35 Rutherford Rd. South were vacant. A creek traversed across the east portion of the proposed Clark Blvd. Extension alignment that was similar to present day. Railway sidings were observed at the same location as present day (between 69 Eastern Avenue and 73 Eastern Avenue).	A number of industrial configured buildings were developed on both sides of Eastern Avenue and the proposed Clark Blvd. Extension. The southwest quadrant of the intersection of Queen St. East and Kennedy Rd. South appeared to be developed into a residential area.
1974	The properties at 25 Rutherford Rd. South and 35 Rutherford Rd. South were occupied by industrial properties. A building structure was observed at 25 Rutherford Rd. South on the proposed alignment for the Clark Blvd. Extension. No building structure was observed on the Project Alignment at 35 Rutherford Rd. South, however, numerous piles of industrial supplies (appeared as rectangular blocks) were stored over the Project Alignment.	The properties south of Queen St. East appeared to be developed for mixed commercial and industrial uses. Properties along Eastern Ave. were further developed with additional industrial configured buildings.
1980	No significant changes observed since 1974.	No significant changes observed since 1974.
1995	No significant changes observed since 1974.	The Study Area was fully developed into a commercial and industrial zone, except for the residential subdivision on the west side of Kennedy Rd. South.
2015	The building at 25 Rutherford Ave. appeared to be demolished.	No significant changes observed since 1995.
2021	No significant changes observed since 1974.	No significant changes observed since 1995.

Based on the review of the aerial photographs, the Project Alignment was developed between 1946 and 1974. The west portion of Eastern Avenue was initially developed with a farmhouse since at least 1946. The remaining portion of Eastern Avenue was part of an agricultural and/or vacant field between 1946 and to approximately the early 1960s. By 1965, Eastern Avenue was developed into a roadway with a number of industrial configured buildings present along both sides of Eastern Avenue and the proposed Clark Blvd. Extension. In 1974, the east portion of

the Project Alignment (i.e. Clark Blvd. Extension) had been developed into industrial properties which remain present to current day. A building structure that formerly existed at 25 Rutherford Rd. South over the proposed the Clark Boulevard Extension in 1974 was demolished by 2015. No building structures were observed directly over the Clark Boulevard Extension alignment that extends through 35 Rutherford Road South; however, piles of industrial supplies appeared to be stored on the property and possibly over the proposed alignment.

(ii) Topography, Hydrology, Geology

A topographic map was obtained and reviewed from The Atlas of Canada – Toporama presented by Natural Resources Canada. A copy of the map is presented in Appendix F. According to the map, the ground surface of the Project Alignment is approximately Elevation 220 m in the west and slopes down towards the east to approximate Elevation 215 m near Rutherford Road. The regional ground surface in the Study Area generally slopes down towards the southeast. A creek extended through the eastern portion of the proposed Clark Boulevard Extension and Project Alignment that flows easterly.

The regional physiography, geology and bedrock characteristics were reviewed from the maps provided by OGS Earth collected by the Mines and Minerals Division of the Ministry of Energy, Northern Development and Mines. The maps are available to download from the Ministry's website and to view in Google Earth.

The Phase One Study Area is located within the Physiographic Region of the Peel Plain. The surficial soils are mainly comprised of clay to silt-textured till that was derived from glaciolacustrine deposits or shale. The area in the vicinity of the creek was characterized by fine-textured glaciolacustrine deposits. The bedrock beneath the Phase One Study Area is mainly comprised of shale, limestone, dolostone, and siltstone of the Queenston Formation.

(iii) Fill Materials

Fill materials are anticipated to exist beneath roadways (i.e., Eastern Ave.) and along roadway shoulders that were used for construction to establish design grades. In addition, fill materials may have been placed beneath the proposed Clark Boulevard Extension at 25 and 35 Rutherford Road South as part of the development of the properties, including the area of the former building (at 25 Rutherford Road South).

(iv) Water Bodies, Areas of Natural Significance and Groundwater Information

The closest surface water body is a tributary of Etobicoke Creek that originates to the north of the proposed Clark Boulevard Extension and flows easterly across the Project Alignment. The tributary channel is wooded and vegetated. The tributary merges into Etobicoke Creek to the south of the Pearson Airport and is under the jurisdiction of the Toronto and Region Conservation Authority.

The presence of areas of natural significance is determined from a review of the following areas:

- An area reserved or set apart as a provincial park or conservation reserve under the *Provincial Parks and Conservation Reserves Act, 2006*;
- An area of natural and scientific interest (ANSI) (life science or earth science) identified by the Ministry of Natural Resources and Forestry (MNR) as having provincial significance;
- A wetland identified by MNR as having provincial significance;
- An area designated by a municipality in its official plan as environmentally significant, however expressed, including designations of areas as environmentally sensitive, as being of environmental concern and as being ecologically significant;
- An area designated as an escarpment natural area or an escarpment protection area by the Niagara Escarpment Plan under the *Niagara Escarpment Planning and Development Act*;
- An area which is habitat of a species that is classified under Section 7 of the *Endangered Species Act, 2007* as a threatened or endangered species;
- Property within an area designated as a natural core area or natural linkage area within the area to which the Oak Ridges Moraine Conservation Plan under the *Oak Ridges Moraines Conservation Act, 2001* applies;
- An area set apart as a wilderness area under the *Wilderness Areas Act*.

A review of the above-listed records indicated that no Areas of Natural Significance were identified on the Phase One Property or within the Study Area. In addition, a review of the Ontario Interactive Source Protection Map indicated that the Phase One Property and the Study Area do not contain a well head protection area.

The Phase One Study Area is expected to be fully serviced by municipal drinking water. No water supply wells were identified through a review of the MECP well records or observed during the Site Reconnaissance.

(v) Well Records

A search of the well record database dated May 2021 indicated there were no water supply wells in the Phase One Study Area. One commercial recharge well was reported at 25 Hansen Road South. The well status was shown as “not used”. The other wells were categorized as monitoring wells, test holes, abandoned, unknown uses or not used.

A copy of the well record report containing the well ID, location, stratigraphy and water levels are presented in Appendix G.

Based on a review of the well records, the subsurface soil within the Study Area mainly comprised sand and gravel fill that was underlain by fine-textured silt, clay and/or silt and clay till over bedrock. The bedrock was encountered from approximately 4 m to 12 m below grade. Groundwater was mainly encountered at depths of between approximately 1.5 m and 5.0 m below the ground surface.

A monitoring well record (Well ID: 7298266) registered at 253 Queen Street East reported an approximate 380 m of sand. No similar stratigraphy was reported in nearby wells.

d. Site Operating Records

No site operating records were made available to Thurber for review.

5. INTERVIEWS

No interviewees were made available to Thurber for an interview.

6. SITE RECONNAISSANCE

a. General Requirements

A Site Reconnaissance of the Project Alignment and the Phase One Study Area was conducted on August 3, 2021, and September 8, 2021, by a Thurber Representative, Ms. Eda Cui, P. Eng. The site visit was conducted after a general review of the historical records and targeted areas of the Project Alignment and the surrounding properties that may contribute to APECs.

The Site Reconnaissance was documented with a field checklist, field notes and photographs, as required. Select photographs (Photos 1 to 12) are included in Appendix H. The Site visit was carried out between 1:00 pm and 4:30 pm for both visits. During the Site Reconnaissance, the temperature was approximately 27°C and the weather and ground surface were dry.

The Site Reconnaissance was conducted from publicly accessible areas only except for the east portion of the Project Alignment where access to the properties at 25 and 35 Rutherford Road South were provided by HDR Inc..

b. Specific Observations at the Project Alignment

Eastern Ave. from Kennedy Road South to Hansen Road South

- i. *Building Structures and Improvements*: No building structures existed on this portion of the Project Alignment. The portion of Eastern Avenue within the Project Alignment was generally paved by asphalt with gravel shoulders and ditches on both sides of the road (Photo 1).
- ii. *Below-ground structures*: No below-ground structures were observed on this portion of the Project Alignment, except for the utility lines and corridors.
- iii. *Tanks, pumps and others*: No tanks or pumps existed on this portion of the Project Alignment.
- iv. *Potable and non-potable water sources*: Municipal water supply lines are expected to exist beneath the road surface with laterals extending off of the main line that connect to the individual buildings.
- v. *Underground utilities and service corridors*: Street lights and hydro poles/lines were observed on the south side of Eastern Avenue. Road-side ditches were observed on both sides of the road. Sanitary manholes were observed near the center line of the roadway.
- vi. *Exist and entry points buildings*: There were no buildings on this portion of the Project Alignment.
- vii. *Existing and former heating and cooling system*: Not applicable.
- viii. *Drains, pits, sumps*: Not applicable.

- ix. Unidentified substances: No unidentified substances were observed during the Site Reconnaissance, although asbestos may be present in the asphalt.
- x. Stains and corrosions on floors: Not applicable.
- xi. Wells: No wells were observed on this portion of the Project Alignment.
- xii. Sewage Works: Road-side ditches for storm water were observed on both sides of Eastern Avenue. Sanitary manholes were observed near the center line of the roadway.
- xiii. Ground surface: The ground surface along Eastern Avenue within the Project Alignment appeared to be recently paved. Minor cracking was observed in the asphalt near Kennedy Road South. Minor stains typical of road markings were observed near the entrances of 69 Eastern Avenue, 75 Eastern Avenue and 79 Eastern Avenue, however, significant staining was observed near the abandoned railway sidings between 69 Eastern Avenue and 73 Eastern Avenue (Photo 2).
- xiv. Current or former railway lines: An abandoned railway siding (Photo 2) was observed between 69 Eastern Avenue and 73 Eastern Avenue.
- xv. Areas not covered by building or other structures: No stressed vegetation was observed along the road-side ditches. No fill materials or debris were observed on the ground surface within the Project Alignment.

35 Rutherford Road South

The property is currently owned by AP Infrastructure Solutions GP Inc., and the present tenant is Precon Precast Limited: access was made available to Thurber by HDR Inc.

Two above ground fuel storage tanks (Photo 3) were observed on this property near the property entrance at Hansen Road South and Eastern Avenue. The tanks were placed on a concrete pad. Multiple building structures and numerous pre-cast concrete blocks were stored in the area of the proposed project alignment. The ground surfaces near the property entrances at Hansen Road South and Rutherford Road South generally consisted of sand and gravel. A number of reinforcing steel bars were visible near the entrance at Rutherford Road South.

Existing buildings and structures include the facilities on the concrete plant property at 35 Rutherford Road. Considering buildings were present on the site in the late 1960s/early 1970s, designated and hazardous materials may be present in the building materials and infrastructure.

In this regard, a Designated and Hazardous Substance Survey is recommended as part of Phase One and Two ESAs if the buildings are going to be acquired as part of the property acquisition to accommodate the proposed road improvements/extension. Surveys are also recommended for the properties along Eastern Avenue where the Right of Way (ROW) required to widen the road includes a portion(s) of existing buildings(s), if any.

The PCAs identified on the Project Alignment through the Site Reconnaissance are listed as follows:

- **PCA# 12: Concrete, Cement and Lime Manufacturing**
 - Manufacturing of concrete products at 35 Rutherford Road South.
- **PCA# 28: Gasoline and Associated Products Storage in Fixed Tanks**
 - Above ground storage tanks at 35 Rutherford Road South

25 Rutherford Road South

The property is currently owned by the City of Brampton and access was made available to Thurber by HDR Inc. A Site Reconnaissance of this property was conducted on September 8, 2021. Photographs of the property are provided in Appendix H.

The property was vacant at the time of the Site Reconnaissance. No buildings or other structures were visible, although a large shallow excavation (i.e., less than 1 m deep) existed across a major portion of the property, with a smaller excavation to the west. A geomembrane liner with gravel existed across the bases of the excavations. Multiple groundwater monitoring wells existed around the perimeter of the excavations and on the property: the purpose of the excavations and monitoring wells are unknown but may be related to remediation and/or monitoring of the groundwater conditions.

The majority of the ground surface was generally covered with sand and gravel with vegetated areas consisting of grass/weeds/brush and mature trees extending across the south and west portions and boundaries of the property. No surface water was present at the site, with the exception of ponded water that existed in the shallow excavations: the water appeared clear with no sheen or odour. No PCAs were identified on this property during the Site Reconnaissance, however the presence of the excavations and monitoring wells (Photos 11 and 12) may be an indication that impacted soils and/or groundwater may be present on site.

The PCAs identified on the Project Alignment through the Site Reconnaissance are listed as follows:

- **PCA# 46: Rail Yards, Tracks and Spurs**
 - Railway Sidings between 69 and 73 Eastern Avenue including the adjacent stained areas
- **PCA# 30: Importation of Fill Material of Unknown Quality**
 - Fill materials are expected to exist beneath Eastern Avenue and may be present on the properties at 25 and 35 Rutherford Road as part of site development for industrial purposes, particularly at 25 Rutherford Road South where a former building (depicted in FIPs) was demolished, and fill may have been imported for grading or backfill purposes. The property at 25 Rutherford Road South was observed to be vacant during the Site Reconnaissance, although shallow excavations and multiple monitoring wells exist on the property that may be related to impact subsurface conditions, remediation and/or monitoring of the groundwater conditions.

(i) Enhanced Investigation Property

The east portion of the proposed Clark Boulevard Extension extends through existing and formerly occupied industrial properties which would be categorized as enhanced investigation sites. The portion of the private property at 35 Rutherford Road South where the proposed alignment is planned generally consisted of a storage yard for pre-cast concrete products. A walkover of the property at 25 Rutherford Road South identified that the property is currently abandoned and vacant with no property use records available, however shallow excavations and multiple monitoring wells existed on the property, as noted above.

c. Written Description of Investigation

The Site Reconnaissance was conducted on August 3, 2021, and September 8, 2021, by Ms. Eda Cui, P.Eng. The Site Reconnaissance involved a “walk-through” of the Project Alignment and the Study Area from publicly accessible areas. The Site Reconnaissance was conducted after a preliminary review of available records to provide supplementary information regarding the PCAs and/or APECs along the Project Alignment and the Study Area.

The purpose of the Site Reconnaissance was to observe property uses, physical settings and topographic features of the Project Alignment and the Phase One Study Area in accordance with Sections 13 and 14 of Schedule D of O. Reg. 153/04, as amended. The information was evaluated to identify PCAs, contaminant pathways, contaminants of potential concern, sensitive

receptors and visual indications of actual or potential contamination that may impact the environmental conditions of the Project Alignment.

The Project Alignment consisted of Eastern Avenue from Kennedy Road South to Hansen Road South, and the proposed Clark Boulevard Extension from Hansen Road South to Rutherford Road South. The proposed Clark Boulevard Extension extended through private properties at 25 Rutherford Road South and 35 Rutherford Road South.

The following PCAs were identified during the Site Reconnaissance in the Phase One Study Area.

- **PCA# 10: Commercial Autobody Shops**
 - Eastern Avenue: 60 (Photo 4), 69, 79
 - Hansen Road South: 7, 10, 27, 38
 - Kennedy Road South: 20, 22, 24, 26, 28, 30
 - Queen Street East: 243
 - Rutherford Road South: 19, 26, 28, 32
- **PCA# 11: Commercial Trucking and Container Terminals**
 - Commercial trucking terminals were observed at 14 Hansen Road South (Photo 5) and 27 Hansen Road South.
- **PCA# 12: Concrete, Cement and Lime Manufacturing**
 - Manufacturing of concrete products at 35 Rutherford Road South.
- **PCA# 34: Metal Fabrication**
 - Osburn Tools was observed at 25 Hansen Road South; Designed Precision Castings Inc. was observed at 75 Eastern Avenue.
- **PCA# 37: Operation of Dry-Cleaning Equipment (where chemicals are used)**
 - A dry cleaner was observed at 239 Queen Street East (Photo 6).
- **PCA# 47: Rubber Manufacturing and Processing**
 - A rubber manufacturing plant was observed at 68 Eastern Avenue
- **PCA# 52: Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems**
 - City of Brampton Apparatus and Maintenance Facility was observed at 52 Rutherford Road South (Photo 7).
- **PCA# 55: Transformer Manufacturing, Processing and Use**
 - Pad-mounted and pole-mounted transformer were frequently observed in the Study Area.

- **PCA# 57: Vehicles and Associated Parts Manufacturing**
 - A manufacturer of auto parts was observed at 19 Rutherford Road South.
- **PCA# Other: Furniture Manufacturing**
 - A manufacturer of furniture was observed at 34 Hansen Road South (Photo 8).
- **PCA# Other:**
 - Maintenance of construction and forestry machinery at a rental supply company at 36 Rutherford Road South (Photo 9).

Photo 3 shows observations of 35 Rutherford Road South that contains the west portion of the proposed Clark Boulevard Extension from the intersection of Hansen Road South and Eastern Avenue, and Photo 10 provides observations of the east portion from the intersection of Rutherford Road South and Clark Boulevard.

During the Site Reconnaissance, no drinking water wells were observed either on the Project Alignment or within the Phase One Study Area. The entire Study Area is expected to be serviced by municipal drinking water.

A tributary of Etobicoke Creek with vegetated/wooded banks was observed within the east portion of the Study Area that flowed easterly. No areas of natural significance were identified through the records review or during the Site Reconnaissance.

In addition to the Project Alignment, the properties fronting Eastern Avenue within the project limits were observed with respect to the occupants and business operations. A description of these properties, from west to east, is provided as follows. The PCAs identified through these observations were previously provided.

- 20 Kennedy Road South: The property was occupied by Kal Tire – an autobody shop. One single-story building with multiple bay doors was observed on the property.
- 22 Kennedy Road South: The property was occupied by Active Green + Ross – an autobody shop. One single-story building with multiple bay doors was observed on the property.
- 24 Kennedy Road South: The property was occupied by a car wash; however, the building was located approximately 50 m south of the Project Alignment. The portion of the property adjoining Eastern Avenue was used as a drive-thru for the car wash.

- 60 Eastern Avenue: The property was occupied by AM Auto Sales and Services – an autobody shop. One single story building with multiple bay doors was observed on the property.
- 63 Eastern Avenue: No business name was observed on this property; however, autobody shop services were observed in one single-story building with multiple bay doors.
- 67 and 69 Eastern Avenue: The property was occupied by JA Towing. A metal clad shed and a one-story multi-unit building were observed on the property. The units appeared to be occupied by autobody shops. The occupants included Devicode Automotive, Glorious Auto, Euro Performance, Cars Dome, and Orange Fine Cars.
- 68 Eastern Avenue: No business name was observed on the building. Based on Google Maps, the property was occupied by Textile Rubber and Chemical Canada. Multiple truck trailers and loading docks were present on the site. A two-story building complex was observed on the property. An abandoned railway siding extended onto this property.
- 73 Eastern Avenue: The property was occupied by Auto Selection – an auto trader. One single-story building was observed on the property. No service garage was observed.
- 75 Eastern Avenue: The property was occupied by Designed Precision Castings. A two-story building with a bay door was observed on the property.
- 79 Eastern Avenue: The property was occupied by J&A Auto Service Inc., AP Auto Sales, and Phoeni Custom Autobody Inc. One single-story building with multiple units was observed on the property.
- 80 and 90 Eastern Avenue: The property was occupied by a light commercial plaza. The plaza occupants included a real estate company, a dentist, and other light commercial shops. The majority the units appeared empty. A pad-mounted transformer was located in the plaza approximately 50 m to the north and northwest of the Project Alignment. The transformer appeared to be relatively new with no stains visible on the underlying concrete pad.
- 25 Hansen Road South: The property was occupied by Clarkson Osborn Tools.

Numerous cars, vehicles, trailers and trucks were parked along the shoulder lanes on Eastern Avenue within the project limits, particularly in the west portion of the Project Alignment.

7. REVIEW AND EVALUATION OF INFORMATION

(i) Current and Past Uses

Based on the historical records review and Site Reconnaissance, the current and past uses of the Project Alignment is provided in the following table:

Table of Current and Past Uses of the Phase One Property (Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)				
Year	Name of Owner	Description of Property Use	Property Use¹	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
Eastern Avenue – Kennedy Road South to Hansen Road South				
1946 - 1965	Private owners	Residential use near the west portion of the Project Alignment, Agricultural or other use for the remaining portion.	Residential, Agricultural/Other	A farmhouse existed at the west end of the Project Alignment in the 1945 and 1954 aerial photos, while the remaining portion of the Project Alignment was vacant. Eastern Avenue was visible in the 1965 aerial photo.
1965 Present	The Municipality of Brampton	Roadway	Community Use	
Proposed Clark Boulevard Extension – 35 Rutherford Road South				
1837 - 1962	Private owners	Vacant	Agricultural or other use	The property at 35 Rutherford Rd. South was vacant in 1965, and occupied by industrial operations in 1974.
1962 - 2020	Multiple transfers between Pre-Con Limited, St. Marys Cement Limited, Blue Circle Canada Inc., Armtec Holdings Limited (renamed to AP Infrastructure Solutions GP Inc.)	Manufacturing plant of concrete products and preserved wood products.	Industrial use	
2021	AP Infrastructure Solutions GP Inc. (Present Owner)	Currently leased to Pre-Con Limited – a manufacturer of concrete products.	Industrial use	
Proposed Clark Boulevard Extension – 25 Rutherford Road South				
Prior to 1969	Private owners	Vacant	Agricultural or other use	No listings available in City Directory. The property was vacant in the 1965 aerial photos.
1971 - 1974	Kirk Containers Ltd./ Brock Containers	Manufacturing of cardboard containers.	Industrial use	The property was occupied by Kirk Containers in 1971 FIP, and by Brock Containers in the 1973/74 City Directories.
1983/84	Gayla Hough Kites Limited	unknown	Industrial use	The property was occupied by Gayla Hough Kites Limited in the 1983/84 City Directories.

Table of Current and Past Uses of the Phase One Property (Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)				
1988/89	Haughs Products Ltd.	Unknown	Industrial use	The property was occupied by Haughs Products Ltd. in the 1988/89 City Directories.
1994 - 2000	Multiple unit plaza for light commercial shops	Commercial plaza	Commercial use	The property was occupied by a multiple unit plaza in the 1994 and 2000 City Directories.
2009 – Present	City of Brampton	Vacant	Commercial use	The property became vacant in 2005. Since 2009, multiple records at the property were registered under the City of Brampton. The property is currently owned by the City of Brampton.

Notes:

1. For each owner, specify one of the following types of property use (as defined in O. Reg. 153/04) that applies: Agriculture or other use, Commercial use, Community use, Industrial use, Institutional use, Parkland use and Residential use
2. Property owners of 25 Rutherford Road South was obtained from EcoLog ERIS, City Directories, Fire Insurance Maps wherever available.

(ii) Potentially Contaminating Activities

The PCAs, as defined in Table 2, Schedule D of O. Reg. 153/04 (as amended), identified on the Project Alignment and in the Phase One Study Area are presented in the following table and on Drawing 30427-2.

Address (Approximate distance to the Project Alignment ¹)	Source	PCA No. (Table 2, Schedule D, O. Reg. 153/04, as amended)	Descriptions	Contribute to APEC (Y/N)	APECs / Rationale for not contributing to APECs
On-Site	Site Visit	#30	-Fill materials anticipated beneath roadways and industrial properties at 23 and 25 Rutherford Rd. South, particularly at 25 Rutherford Rd. South where a building was demolished and possibly backfilled.	Y	APEC 1 APEC 2
On-Site	FIP, Site Visit	#46	-Railway Sidings with stained soils on the south side of the road	Y	APEC 3
25 Rutherford Rd. South (On-site)	FIP	#45	-Manufacturing of cardboard containers (Kirk Containers Ltd.)	Y	APEC 2
	EcoLog ERIS	#54	-Mattress Manufacturer	Y	APEC 2
35 Rutherford Rd. South	EcoLog ERIS, FIP, Site Visit	#28	-Fuel storage tanks -Manufacturing of concrete	Y	APEC 4

Address (Approximate distance to the Project Alignment ¹)	Source	PCA No. (Table 2, Schedule D, O. Reg. 153/04, as amended)	Descriptions	Contribute to APEC (Y/N)	APECs / Rationale for not contributing to APECs

(iii) Areas of Potential Environmental Concern

The PCAs identified within the Project Alignment were considered to directly result in corresponding Areas of Potential Environmental Concern (APECs), while the PCAs identified in the Phase One Study Area were evaluated as possible APECs contributors on the basis of various criteria that included observations noted during the Site Reconnaissance, the location and distance of the activity from the Project Alignment, the quantity and nature of substances associated with the PCA, the soil stratigraphy and groundwater conditions underlying the Phase One Study Area, as well as the migration potential and preferential transport pathways that may exist between the PCA location and the Project Alignment.

Rationale for PCAs that do not Contribute to APECs:

In general, the PCAs that were identified in the hydrogeological and topographical down-gradient locations in relation to the Project Alignment are not expected to impact the soil and groundwater underneath the Project Alignment since the migration and transport of contaminants in the subsurface surroundings are mainly governed by gravitational flow in the unsaturated zone, and the groundwater flow direction in the saturated zone. In addition, the PCAs distantly offset from the Project Alignment at upgradient locations may be considered a low risk to impact the Project Alignment when quantity of the potential contaminants of concerns (PCOCs) are relatively small. The rationale for PCAs that do not contribute to APECs were listed in the PCA Table in Section 7 (ii).

Rationale for PCAs to Contribute to the Existence of APECs:

The PCAs located upgradient to the Project Alignment are considered to have a potential to impact the soils and groundwater within the Project Alignment due to the potential transportation and migration of the contaminants in groundwater. In addition, the PCAs located proximal to the Project Alignment at cross-gradient or down-gradient locations are also considered to have the potential to impact the soils and groundwater within the Project Alignment due to the possible existence of preferential pathways, diffusion, and dispersion of the contaminants in groundwater and ponding of free phase contaminants at the interface of low permeable soil. As such, the PCAs identified at the Phase One Property, along the Project Alignment, and to the north and northwest of the Project Alignment are generally considered as having impact to the soil and groundwater beneath the Project Alignment.

The identified APECs are presented in the following table and on Drawing 30427-3.

APEC #	Location of APEC within the Project Area	Potentially Contaminating Activity # (Table 2, Schedule D, O.Reg. 153/04) Description	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern ¹	Media Potentially Impacted (Groundwater, soil and/or sediment)

(iv) Conceptual Site Model

The Conceptual Site Model (CSM) is based on the results of this Phase One ESA and consists of the following drawings:

Drawing 30427-1: Site Location Plan

Drawing 30427-2: Property Addresses and Land Uses

Drawing 30427-3: Potentially Contaminating Activities and Areas of Potential Environmental Concern

The drawings show the following key features of the Phase One Property and Phase One Study Area:

- Building structures within the Project Alignment and the Phase One Study Area are shown on Drawing 30427-2;
- Roads, including names, within the Phase One Study Area are shown on Drawing 30427-2;
- Water Bodies located in the Phase One Study Area (Drawing 30427-2);
- The predominant land uses adjacent to the Project Alignment are shown on Drawing 30427-2;
- Areas where potentially contaminating activities have occurred, including the presence of tanks, are shown on Drawing 30427-3;
- Areas of potential environmental concern resulting from the potentially contaminating activities are shown on Drawing 30427-3.

The results of the document search and Site Reconnaissance that were completed and reviewed for this Overview Phase One ESA were used to provide the following details for the CSM.

- The Project Alignment consists of existing Eastern Avenue from Kennedy Road South to Hansen Road South, and the proposed Clark Boulevard Extension from Hansen Road South to Rutherford Road South. The proposed Clark Boulevard Extension includes portions of two private properties at 25 and 35 Rutherford Road South.
- Based on the information obtained through the available records review and Site Reconnaissance, the first developed use of Eastern Avenue from Kennedy Road South to Hansen Road South was a farmhouse (residential use) near the west end of the road as observed in the 1946 aerial photograph, followed by a roadway (community use) that was apparent in the 1965 aerial photograph. The first developed uses of 25 Rutherford Road South and 35 Rutherford Road South were industrial uses as observed in the 1974 aerial photograph. Prior to the first development uses, the Project Alignment was part of an agricultural and/or vacant field. The intended property use for the portion of existing Eastern Avenue will remain unchanged, however the property acquisitions along Eastern Avenue to accommodate the road widenings, as well as 25 and 35 Rutherford Road South for the proposed extension will result in property use changes from industrial to community.
- No building structures currently exist within the proposed Project Alignment along Eastern Avenue or on the property at 25 Rutherford Road South. A building that previously appeared to exist on the 25 Rutherford Road South was no longer evident in the 2015 aerial photograph or during the Site Reconnaissance. Based on the aerial

photographs and the Site Reconnaissance, building structures existed at 35 Rutherford Road South but appeared to be located to the south of the Project Alignment.

- The Project Alignment is situated within a mixed industrial and commercial area. The majority of the surrounding properties within the Phase One Study Area were generally occupied by manufacturing plants and autobody shops. An abandoned railway siding was oriented perpendicular to Eastern Avenue between 69 and 73 Eastern Avenue where stained soil was observed on the south side of the road.
- A tributary of Etobicoke Creek originated to the north of the Project Alignment and flows easterly, traversing between 25 and 35 Rutherford Road South. The tributary merges into Etobicoke Creek to the south of Pearson Airport. No areas of natural significance were identified within the Phase One Study Area.
- The ground surface along the Project Alignment is relatively flat, ranging from approximate Elevation 220 m in the west to approximate Elevation 215 m near Rutherford Road and the east portion of the Project Alignment. The regional ground surface in the Study Area generally slopes down towards the southeast. Based on the geologic maps, the Phase One Study Area is located within the Physiographic Region of the Peel Plain. The surficial soils are mainly comprised of clay to silt-textured till that was derived from glaciolacustrine deposits or shale. The area in the vicinity of the tributary is characterized by fine-textured glaciolacustrine deposits. The bedrock beneath the Phase One Study Area is mainly comprised of shale, limestone, dolostone, and siltstone of the Queenston Formation.
- Based on the well records reviewed, the subsurface soil within the Study Area mainly comprised sand and gravel fill that was underlain by fine-textured silt, clay and/or silt and clay till over bedrock. The bedrock was encountered at depths of approximately 4 m to 12 m below the ground surface. Groundwater was mainly encountered between depths of approximately 1.5 m and 5.0 m below grade.
- Further investigation would be required to determine the groundwater flow direction, however, based on the topographical features and surrounding water bodies, the groundwater flow direction is anticipated to be easterly to southeasterly. Locally, shallow groundwater flow conditions may be perched within existing fill materials and influenced by existing underground utility corridors.
- A number of PCAs were identified within the Project Alignment and Study Area that were summarized in the table presented in Section 7 (ii) of the report and shown on Drawing 30427-3. The PCAs identified on the Phase One Property are considered to directly contribute to APECs which included fill materials that are anticipated to exist beneath Eastern Avenue and on the industrial properties developed at 25 and 35 Rutherford Road South (particularly at 25 Rutherford Road South where a building was

demolished), railway sidings with associated stained soils, manufacturing of cardboard containers and mattresses at 25 Rutherford Road South, and manufacturing of concrete products, preserved wood products and structural metal products at 35 Rutherford Road South. An autobody shop, and a private fuel outlet with storage tanks were also reported at 35 Rutherford Road South, as well as a spill of 400 L of diesel and 150 L of coolant in 2019.

- The PCAs identified in the Phase One Study Area that are considered to contribute to APECs on the Project Alignment included various manufacturing activities; metal fabrication, plating, treatment and coating; dry cleaners; autobody shops; fuel storage tanks; trucking terminals; Brampton Hydro; waste generators and spills.
- The PCAs for the roadside properties along the Eastern Avenue portion of the Project Alignment include the following:
 - 20 Kennedy Road South: Autobody shops with fuel storage tanks
 - 22 Kennedy Road South: Autobody shops
 - 24 Kennedy Road South: Car Wash but 50 m off-set: Not considered as a PCA contributor to APECs
 - 60 Eastern Avenue: Autobody shops
 - 63 Eastern Avenue: One underground gasoline tank located near the road
 - 68 Eastern Avenue: Manufacturing of rubber products and adhesives; fuel storage tanks; A spill of 225 L of diesel in 1996.
 - 67 and 69 Eastern Avenue: Autobody shops; Canadian Truck Training Centre; Brampton Hydro with an underground gasoline tank and a garage; a spill of unknown amount of diesel in 1994 and 85 L of motor oil in 2013.
 - 73 Eastern Avenue: Fuel storage tanks; Metal welding.
 - 75 Eastern Avenue: Metal fabrication (Designed Precision Casting)
 - 79 Eastern Avenue: Autobody shops; Manufacturing of vehicle parts.
 - 80 Eastern Avenue: None.
 - 90 Eastern Avenue: None.
 - 25 Hansen Road South: Manufacturing of tools.

- Seven APECs were identified within the Project Alignment and summarized in the table presented in Section 7 (iii) of the report and shown on Drawing 30427-3.
- The COPCs identified within the Project Alignment include metals and inorganics, polycyclic aromatic hydrocarbons (PAHs), petroleum hydrocarbons (PHCs), benzene, toluene, ethylbenzene, xylene (BTEX), volatile organic compounds (VOCs), acid/base/neutral compounds (ABNs), organochlorine pesticides (OCs), chlorophenols (CPs), 1,4-dioxane, and polychlorinated biphenyls (PCBs).
- There is a potential for preferential migration pathways of COPCs along utility corridors for watermains, storm and sanitary sewers that are understood to exist within the roadway allowances for the Project Alignment.
- The uncertainties of the conceptual site model included the absence of FOI responses for the requested properties, and interviews for the private properties. In addition, the conditions of the Project Alignment described in the CSM are based exclusively on observations at the time of the Site Reconnaissance between 1:00 pm and 4:30 pm on August 3, 2021 and September 8, 2021. Thurber has assumed that the provided information from the obtained records is accurate and reliable.

8. CONCLUSIONS

The Project Alignment consists of existing Eastern Avenue from Kennedy Road South to Hansen Road South, and the proposed Clark Boulevard Extension from Hansen Road South to Rutherford Road South. The proposed roadway is designed to extend through two private industrial properties at 25 and 35 Rutherford Road South.

The findings of the Overview Phase One ESA identified a number of PCAs along the Project Alignment and in the Phase One Study Area. In general, the PCAs located at and upgradient to the Project Alignment, and proximal to the Project Alignment at cross-gradient or down-gradient locations, were considered to have a potential to impact the soil and groundwater, and therefore, contribute to APECs within the Project Alignment. A total of seven APECs were identified along the Project Alignment.

The COPCs identified within the Project Alignment include metals and inorganics, polycyclic aromatic hydrocarbons (PAHs), petroleum hydrocarbons (PHCs), benzene, toluene, ethylbenzene, xylene (BTEX), volatile organic compounds (VOCs), acid/base/neutral compounds (ABNs), organochlorine pesticides (OCs), chlorophenols (CPs), 1,4-dioxane and polychlorinated biphenyls (PCBs).

Based on an evaluation of the information obtained during this Overview Phase One ESA, a Phase Two Environmental Site Assessment involving an intrusive investigation is required to confirm or refute the presence of the COPCs in the soil and groundwater in relation to the PCAs and associated APECs.

Phase One and Two ESAs are also recommended for each conveyance involving property acquisition to accommodate the proposed road widenings and extension. In consideration of the era of the existing buildings in the Study Area, Designated and Hazardous Substance Surveys are recommended for the properties along Eastern Avenue where the Right of Way (ROW) required to widen the road includes a portion(s) of existing buildings(s), if any. In addition, asbestos may be present in the road which should be verified prior to disturbance during construction.

STATEMENT OF LIMITATIONS AND CONDITIONS

1. STANDARD OF CARE

This Report has been prepared in accordance with generally accepted engineering or environmental consulting practices in the applicable jurisdiction. No other warranty, expressed or implied, is intended or made.

2. COMPLETE REPORT

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment are a part of the Report, which is of a summary nature and is not intended to stand alone without reference to the instructions given to Thurber by the Client, communications between Thurber and the Client, and any other reports, proposals or documents prepared by Thurber for the Client relative to the specific site described herein, all of which together constitute the Report.

IN ORDER TO PROPERLY UNDERSTAND THE SUGGESTIONS, RECOMMENDATIONS AND OPINIONS EXPRESSED HEREIN, REFERENCE MUST BE MADE TO THE WHOLE OF THE REPORT. THURBER IS NOT RESPONSIBLE FOR USE BY ANY PARTY OF PORTIONS OF THE REPORT WITHOUT REFERENCE TO THE WHOLE REPORT.

3. BASIS OF REPORT

The Report has been prepared for the specific site, development, design objectives and purposes that were described to Thurber by the Client. The applicability and reliability of any of the findings, recommendations, suggestions, or opinions expressed in the Report, subject to the limitations provided herein, are only valid to the extent that the Report expressly addresses proposed development, design objectives and purposes, and then only to the extent that there has been no material alteration to or variation from any of the said descriptions provided to Thurber, unless Thurber is specifically requested by the Client to review and revise the Report in light of such alteration or variation.

4. USE OF THE REPORT

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. NO OTHER PARTY MAY USE OR RELY UPON THE REPORT OR ANY PORTION THEREOF WITHOUT THURBER'S WRITTEN CONSENT AND SUCH USE SHALL BE ON SUCH TERMS AND CONDITIONS AS THURBER MAY EXPRESSLY APPROVE. Ownership in and copyright for the contents of the Report belong to Thurber. Any use which a third party makes of the Report, is the sole responsibility of such third party. Thurber accepts no responsibility whatsoever for damages suffered by any third party resulting from use of the Report without Thurber's express written permission.

5. INTERPRETATION OF THE REPORT

- a) Nature and Exactness of Soil and Contaminant Description: Classification and identification of soils, rocks, geological units, contaminant materials and quantities have been based on investigations performed in accordance with the standards set out in Paragraph 1. Classification and identification of these factors are judgmental in nature. Comprehensive sampling and testing programs implemented with the appropriate equipment by experienced personnel may fail to locate some conditions. All investigations utilizing the standards of Paragraph 1 will involve an inherent risk that some conditions will not be detected and all documents or records summarizing such investigations will be based on assumptions of what exists between the actual points sampled. Actual conditions may vary significantly between the points investigated and the Client and all other persons making use of such documents or records with our express written consent should be aware of this risk and the Report is delivered subject to the express condition that such risk is accepted by the Client and such other persons. Some conditions are subject to change over time and those making use of the Report should be aware of this possibility and understand that the Report only presents the conditions at the sampled points at the time of sampling. If special concerns exist, or the Client has special considerations or requirements, the Client should disclose them so that additional or special investigations may be undertaken which would not otherwise be within the scope of investigations made for the purposes of the Report.
- b) Reliance on Provided Information: The evaluation and conclusions contained in the Report have been prepared on the basis of conditions in evidence at the time of site inspections and on the basis of information provided to Thurber. Thurber has relied in good faith upon representations, information and instructions provided by the Client and others concerning the site. Accordingly, Thurber does not accept responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of misstatements, omissions, misrepresentations, or fraudulent acts of the Client or other persons providing information relied on by Thurber. Thurber is entitled to rely on such representations, information and instructions and is not required to carry out investigations to determine the truth or accuracy of such representations, information and instructions.
- c) Design Services: The Report may form part of design and construction documents for information purposes even though it may have been issued prior to final design being completed. Thurber should be retained to review final design, project plans and related documents prior to construction to confirm that they are consistent with the intent of the Report. Any differences that may exist between the Report's recommendations and the final design detailed in the contract documents should be reported to Thurber immediately so that Thurber can address potential conflicts.
- d) Construction Services: During construction Thurber should be retained to provide field reviews. Field reviews consist of performing sufficient and timely observations of encountered conditions in order to confirm and document that the site conditions do not materially differ from those interpreted conditions considered in the preparation of the report. Adequate field reviews are necessary for Thurber to provide letters of assurance, in accordance with the requirements of many regulatory authorities.

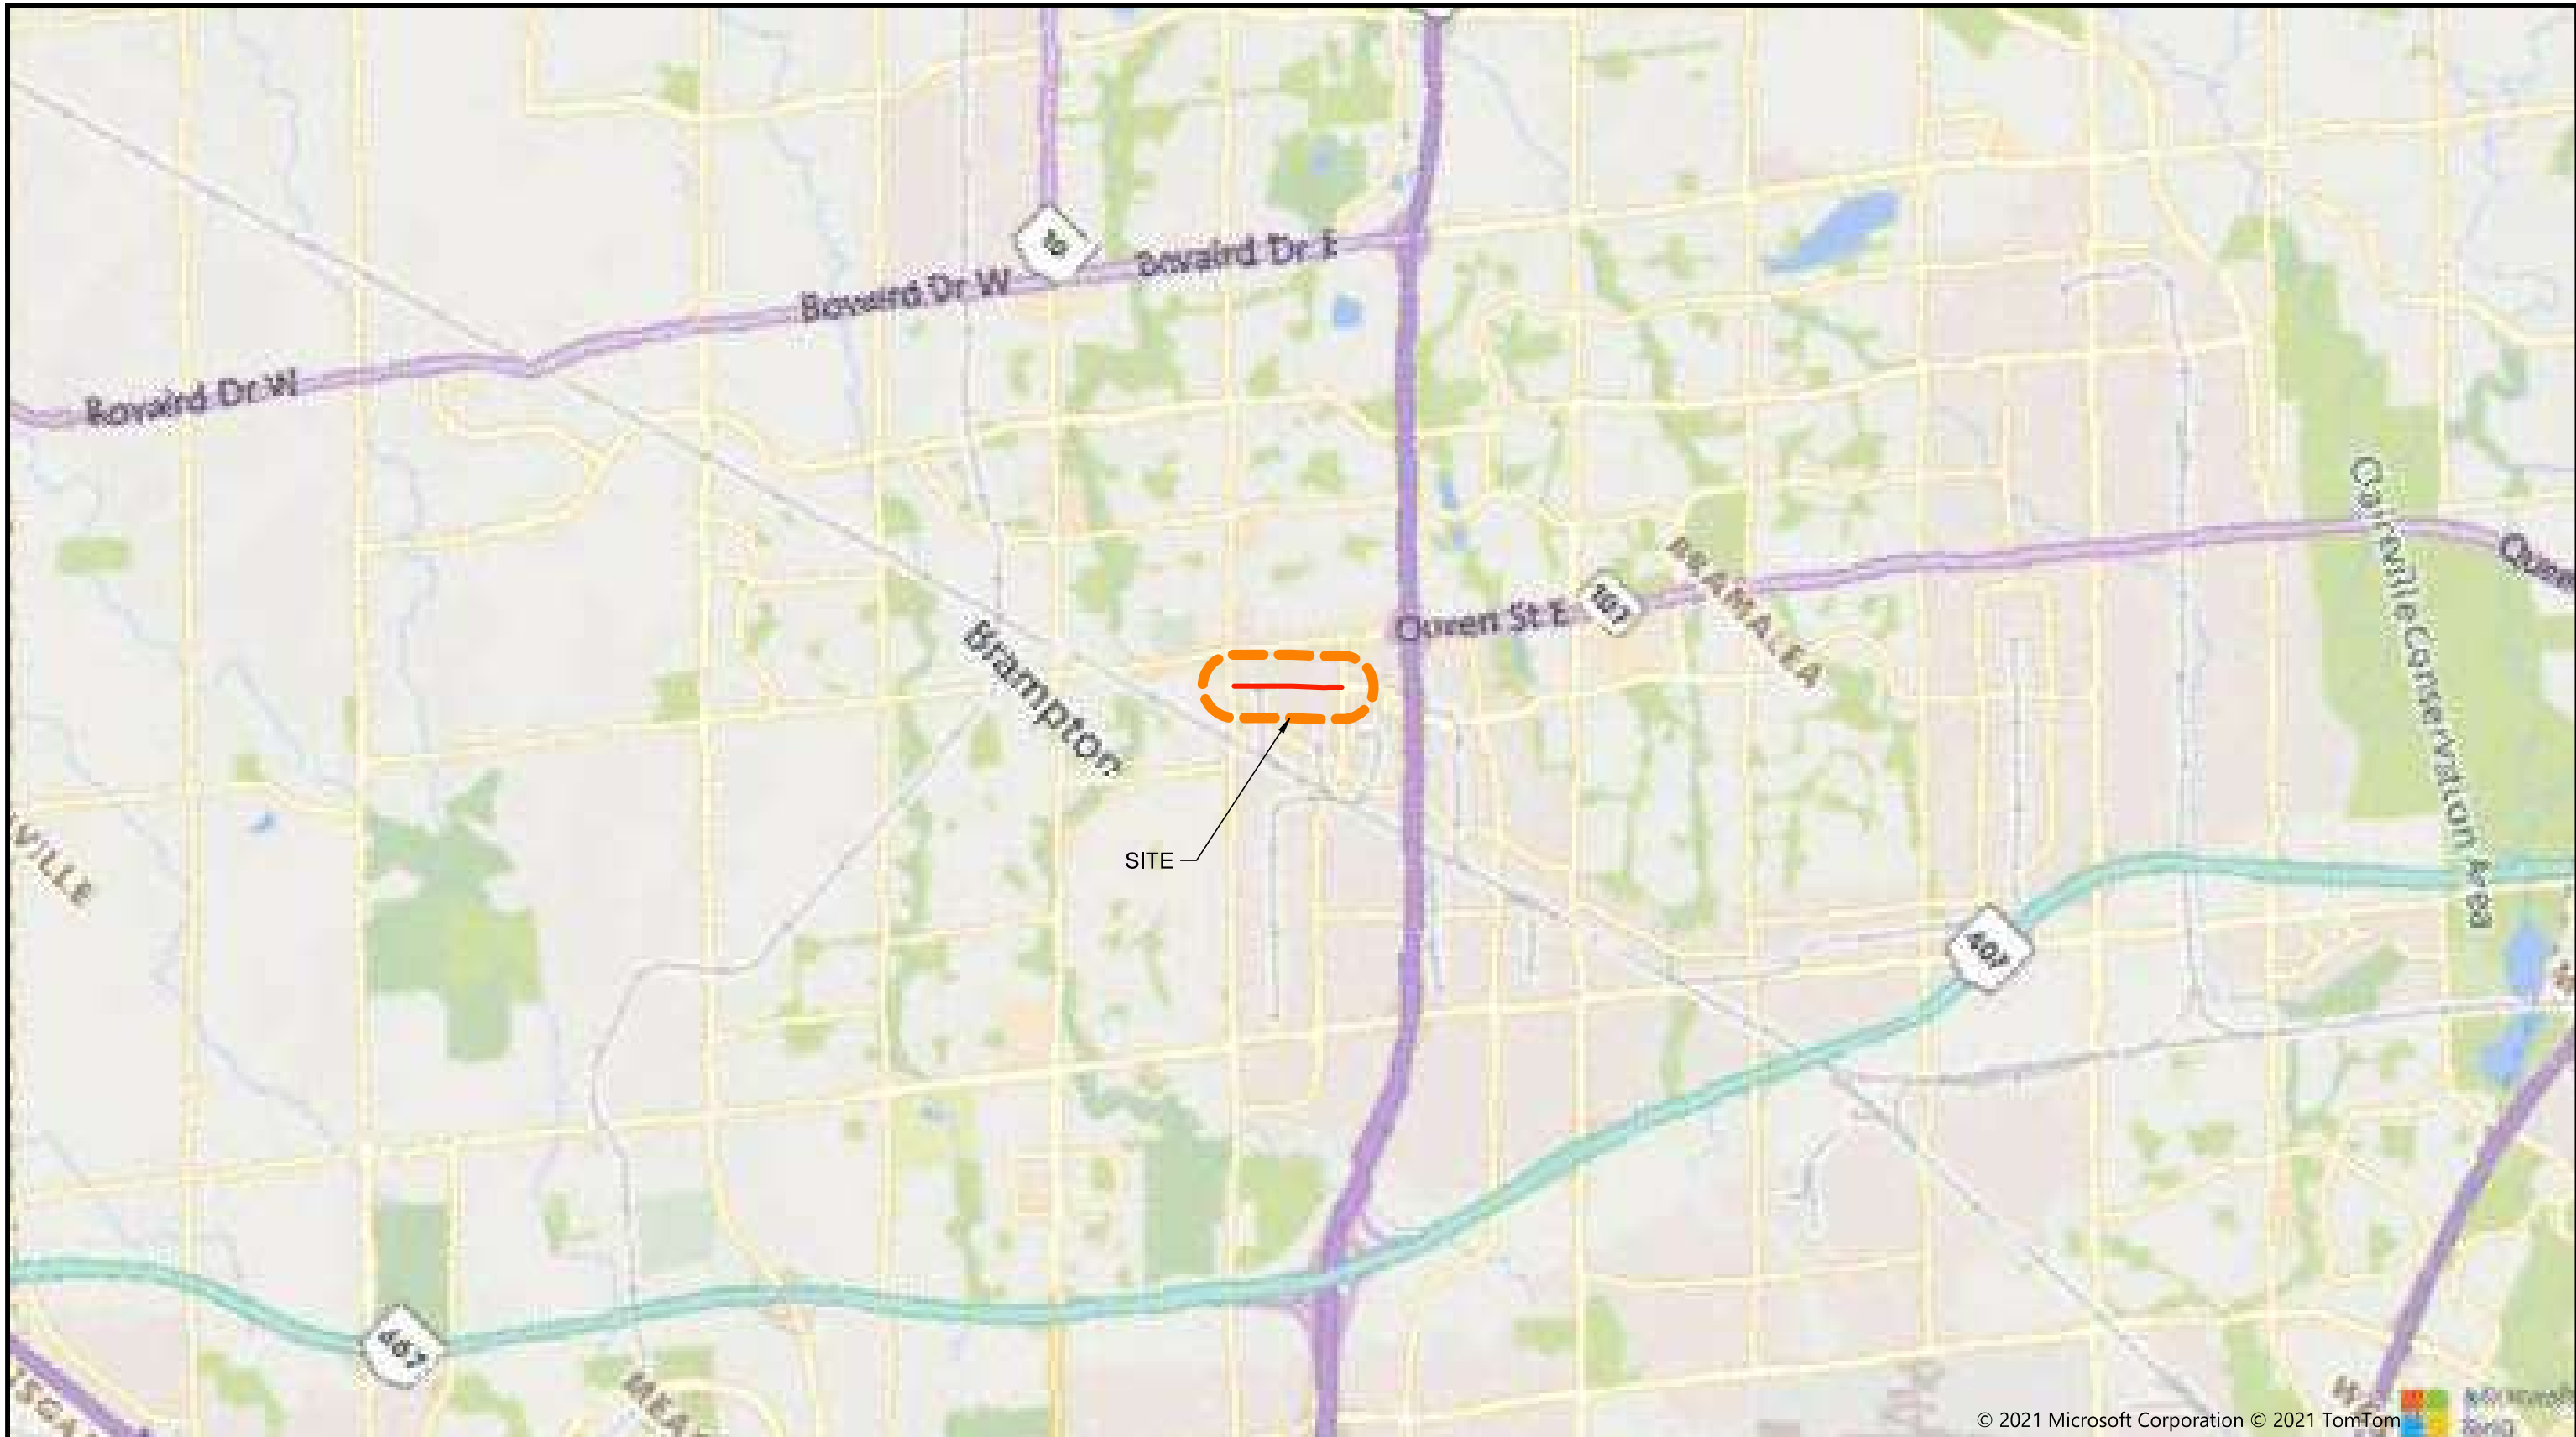

6. RELEASE OF POLLUTANTS OR HAZARDOUS SUBSTANCES

Geotechnical engineering and environmental consulting projects often have the potential to encounter pollutants or hazardous substances and the potential to cause the escape, release or dispersal of those substances. Thurber shall have no liability to the Client under any circumstances, for the escape, release or dispersal of pollutants or hazardous substances, unless such pollutants or hazardous substances have been specifically and accurately identified to Thurber by the Client prior to the commencement of Thurber's professional services.

7. INDEPENDENT JUDGEMENTS OF CLIENT

The information, interpretations and conclusions in the Report are based on Thurber's interpretation of conditions revealed through limited investigation conducted within a defined scope of services. Thurber does not accept responsibility for independent conclusions, interpretations, interpolations and/or decisions of the Client, or others who may come into possession of the Report, or any part thereof, which may be based on information contained in the Report. This restriction of liability includes but is not limited to decisions made to develop, purchase or sell land.

Opta Historical Environmental Services Enviroscan TM Terms and Conditions

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Dec 31, 2020

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2018

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Dec 31, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2021

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2020

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Apr 30, 2021

Drill Hole Database:Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020**Delisted Fuel Tanks:**Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020**Environmental Activity and Sector Registry:**Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Apr 30, 2021**Environmental Registry:**Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Apr 30, 2021**Environmental Compliance Approval:**Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Apr 30, 2021**Environmental Effects Monitoring:**Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007***ERIS Historical Searches:**Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jan 31, 2021**Environmental Issues Inventory System:**Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2021

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial [FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial [GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jan 31, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal [GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial [HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal [IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial [INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario:

Provincial [LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private [MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2021

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Apr 30, 2021

Canadian Pulp and Paper:

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Apr 30, 2021

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 31, 2020

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Apr 30, 2021

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2018

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Apr 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Dec 31, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Aug 2020

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks:

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variances for Abandonment of Underground Storage Tanks:

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Apr 30, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

TOWNSHIP CON LOT UTM DATE CNTR CASING DIA WATER PUMP TEST WELL USE SCREEN WELL FORMATION

Notes:

UTM: UTM in Zone, Easting, Northing and Datum is NAD83; L: UTM estimated from Centroid of Lot; W: UTM not from Lot Centroid
 DATE CNTR: Date Work Completed and Well Contractor Licence Number
 CASING DIA: .Casing diameter in inches
 WATER: Unit of Depth in Fee. See Table 4 for Meaning of Code

PUMP TEST: Static Water Level in Feet / Water Level After Pumping in Feet / Pump Test Rate in GPM / Pump Test Duration in Hour : Minutes
 WELL USE: See Table 3 for Meaning of Code
 SCREEN: Screen Depth and Length in feet
 WELL: WEL (AUDIT #) Well Tag . A: Abandonment; P: Partial Data Entry Only
 FORMATION: See Table 1 and 2 for Meaning of Code
