Documents\5.0\_Correspondence\Communication Plan

**PROJECT NUMBER**

145609

**FROM**

Ben Pascolo-Neveu – Deputy EA Project Manager (Arcadis)  
ben.pascoloneveu@arcadis.com

The Communication Plan for the Schedule 'B' Municipal Class Environmental Assessment (MCEA) to support the Intermodal Drive and Region of Peel watermain extension to Gorewood Drive consists of the following components which are essential to the success of this project:

### Notice of Study Commencement

At the onset of the project, Arcadis prepared and submitted a draft Notice of Study Commencement (NOSC) of the Environmental Assessment process. The City finalized the notice and advertised the study commencement on the City's website for the project and in the Brampton Guardian newspaper. The final version of the NOSC was sent via email to all property owners, utilities companies, Indigenous communities and other stakeholders. The Consultant also distributed physical notices to businesses adjacent to the corridor within the EA Study Limits. The notice package included an invitation to agencies and utility stakeholders to participate in the Technical Agency Committee (TAC) meetings, while property/business owners were invited to join the Stakeholder Group. The Consultant also prepared and submitted the 'Project Information Form' in accordance with the Ministry of Environment, Conservation and Parks (MECP) notification procedure to the MECP.

### Indigenous Consultation

The MCEA process includes a duty to consult and engage with relevant Indigenous communities, as identified by the Ministry of Environment, Conservation and Parks (MECP) Acknowledgement of Notice of Commencement letter dated February 1, 2024. Arcadis shall reach out to Indigenous communities through the Notice of Study Commencement and accompanying introduction letter and at other key project milestones, including the Public Information Centre (PIC) and issuance of the Project File Report (PFR) for 30-day public review. Notices shall be sent to the elected Chiefs and Council and Metis communities. The initial notice and letter shall include a City contact, statement of the nature of the Project, brief synopsis of the details of the Project (including a map), a description of any processes, activities or limitations associated with the Project and a request for the Indigenous community to identify representatives who are appropriate contacts for future communications.

The working Indigenous contacts list for this project is provided in **Appendix A**.

### Technical Agency Committee (TAC)

A Technical Agency Committee (TAC) was established in close collaboration with the City of Brampton staff. The TAC is comprised of City of Brampton, Region of Peel, Toronto and Region Conservation Area (TRCA), Ontario Ministry of Transportation (MTO), Canadian National (CN) and various utility companies, among other technical advisors who may be affected by the Project. CN opted out of the consultation process.

The purpose of the committee is to involve affected technical agencies, in an in-depth manner, as the study progresses. It shall be geared to those with specific interests, utilities and/or agencies and/or ministries that may be affected. It is proposed that these meeting be conducted virtually and provide a presentation to members of the TAC, followed by an opportunity for members to ask questions or provide feedback.

## Communication Plan

### Intermodal Drive and Watermain Extension to Gorewood Drive

#### Municipal Class Environmental Assessment

City of Brampton

September 12, 2025

The Technical Agency Committee shall at the following intervals over the course of the EA study:

- TAC Meeting #1 will be held in advance of the Public Information Centre (PIC) to discuss the development of the Preliminary Design based on the preferred alternative carried forward from the evaluation of alternative solutions and designs. As discussed with City Project Manager, this meeting will be divided into two parts:
  - Tac Meeting #1 (Part 1) – Consists of a general discussion amongst City, Region of Peel, Toronto Regional and Conservation Area (TRCA) and Ontario Ministry of Transportation (MTO) staff.
  - TAC Meeting #1 (Part 2) - The second-half off of the TAC Meeting will be a more focused discussion regarding above- and below-ground utilities providers, including Alectra, Bell, Telecon and Enbridge.
- The Consultant shall ensure Toronto and Region Conservation Authority (TRCA) staff are provided a draft copy of the technical reports and overall Project File Report with a minimum 15 business days to review and provide comments, prior to filing the final Project File Report document.
- A working list of potential TAC participants and contact information for each is provided in **Appendix B**.

#### Stakeholder Group

- It is expected that the Stakeholder Group shall be established at the outset of the study and will be representative of adjacent property owners within the study area who are directly impacted by the Project.
- Stakeholder meetings will be essential for addressing specific concerns identified by stakeholder groups and discussing potential mitigating measures. The study team will hold informal meetings with these groups, with or without City Staff present, as requested, prior to the Public Information Centre (PIC). Ideally, these meetings shall provide a smaller forum for discussion and dialogue than a public meeting. The Stakeholder Group meeting(s) shall be geared for those with specific interests and parties that may be directly affected by the Project. It is expected that this meeting will be held virtually or in-person.
- A working list of potential Stakeholder Group participants and contact information for each is provided in **Appendix C**.

#### Public Information Centre (PIC)

- The PIC represents the primary touch-point for members of the general public to provide input on the development of the Preliminary Design of the Preferred Alternative.
- A 'Notice of PIC' will be prepared in draft and final form for communication by the City. The notice will be printed and mailed to all members included on the list of contacts and stakeholders, and also hand-delivered to nearby businesses per the RFP, as well as advertised on the on the City's website for the project and in the Brampton Guardian newspaper. The Notice shall be issued a minimum of two (2) weeks in advance of the PIC.
- Arcadis has had recent success with online PICs, however, an in-person event could also be discussed with the City if this format is desired. Online PICs can have various formats, including virtual meetings with public participation, posting of materials online only with or without a survey form, or virtual PIC. Arcadis will work with the team to select the right approach. It is anticipated that a PowerPoint presentation, followed by a question and answer period. An optional online survey/feedback form for attendees could be an effective method of gathering additional feedback within a 1 to 2 week period following the PIC.
- The PIC and all comments received will be documented in the study's PIC Progress Report. The report will be prepared as a draft for City review following the comment period.

#### Individual Meetings with Impacted Property Owners

Communication Plan

Intermodal Drive and Watermain Extension to Gorewood Drive

Municipal Class Environmental Assessment

City of Brampton

September 12, 2025

As part of the process to finalize the preliminary design, Arcadis will attend individual meetings with impacted property and business owners in the presence of City staff. It is proposed that all of these meetings be held virtually and will occur during the preparation of the Preliminary Design for the Preferred Alternative.

**Progress Meetings**

Regular progress meetings will be held to provide an update to core City staff on the project team of work that is ongoing upcoming from the wider consultant project team. A powerpoint presentation will be prepared for each meeting and distributed to relevant staff following the discussion, as requested.

**General Communication**

The City Project Manager, Consultant Project Manager and Deputy Project Manager shall be copied on all email correspondence, while other members of the team will be copied only on relevant correspondence, as required, to ensure that information is being disseminated efficiently through the wider project group.

Throughout the project, communication between the consultant team and clients/stakeholders will be conducted in a respectful manner. It is anticipated that most day-to-day communications will occur either through email or Microsoft Teams.

Meeting minutes shall be provided for all major meetings held as part of this study, including the Kick-off Meeting, Technical Advisory Committee (TAC) meetings and Stakeholder Group meetings.

8196 Gorewood						
8188 Gorewood						Gurmeet Singh spoke with Mr. [REDACTED] on 2024-02-02 and he told us that their was an alignment approved by the City of the Intermodal extension to Gorewood. He has retained a planner who is speaking with the City for the development of his properties. His take is that the straight extension of Intermodal through 8188 Gorewood will ruin his lots (plan).
